

A Whopper.

Mr. Andrew Caldwell has presented us with an apple, which he says is a moderate specimen of what his orchard produces—(and we suppose he *meant* it as a specimen of what he *intends sending us!*) It is a *Vanderverer Pipin*, measures thirteen inches in circumference, and weighs fifteen ounces. Who will send us a larger one.—*Goshen Democrat.*

That is nothing. Richard McComber, presented us with an apple the other day which measured fourteen inches in circumference and weighs nineteen ounces. Beat that who can.—*Niles Republican.*

☞ Immediately after, or during the County Fair, we *expect* to be presented with some specimens, which will cast the Niles man entirely in the shade! If we are, we shall certainly speak about it!
