

Presenting —

WAR PRODUCTION FACILITIES of the

Stewart Hartshorn Co.

ESTABLISHED 1860

Manufacturers of
SPRING SHADE ROLLERS
SHADE CLOTH
WINDOW SHADES

Office:
250 Fifth Ave., New York City
Plant:
Muskegon, Michigan

In 1860 the Stewart Hartshorn Co. manufactured the first spring shade roller and have continuously improved upon the original design. Present facilities provide for manufacturing window shades for residential and industrial purposes and also for manufacturing automatic spring rollers for automobiles, railway cars, milling machines, x-ray machines, etc. There is provision for flexible expansion of existing facilities for production of new parts or new products, conceived by our technicians as they solve the problems continually being presented by architects and engineers.

The standing of the Company in its industry, the volume of its business, the discriminating character of its customers, all attest the skill, pride of workmanship and capacities it can offer for war production.

*This presentation has been prepared for the purpose of selling
our facilities rather than our product during the emergency.*
