

An aerial photograph of a large-scale agricultural reclamation project in California. The foreground shows a worker in a white shirt and cap standing on a dirt path, holding a shovel. The middle ground features a series of long, parallel, raised earthen ridges or furrows, likely for water control or soil management. In the background, a flooded area contains several buildings, possibly a farm or a small settlement, partially submerged in water. The overall scene is dominated by earthy tones and the geometric patterns of the reclamation work.
