DOWN THE WORLD'S MOST DANGEROUS RIVER

By
CLYDE EDDY

"When summer comes this snow melts and tumbles down the mountain sides in millions of cascades. A million cascade brooks unite to form a thousand torrent creeks; a thousand torrent creeks unite to form half a hundred rivers beset with cataracts; half a hundred roaring rivers unite to form the Colorado, which flows, a mad, turbid stream, into the Gulf of California."

—JOHN WESLEY POWELL.
