

OUR RIVERS: TOTAL USE FOR GREATER WEALTH

The Colorado River

HOUSE DOCUMENT 419, EIGHTIETH CONGRESS, FIRST SESSION

The Colorado River

“A NATURAL MENACE BECOMES A NATIONAL RESOURCE”

*Interim Report on the Status of the Investigations
Authorized To Be Made by the Boulder Canyon
Project Act and the Boulder Canyon Project
Adjustment Act*

UNITED STATES DEPARTMENT OF THE INTERIOR

J. A. Krug, Secretary

BUREAU OF RECLAMATION

Michael W. Straus, Commissioner

JULY 1947

Contents

This TABLE OF CONTENTS is a guide to the first 95 pages of this book, and to those pages only, all of which are numbered in italics. Following the page that is numbered 95 (in Italics) there is a second table of contents which is a guide to the remainder of the book; that is, pages 3 through 295, all of which are numbered in Roman. Consequently, there are duplicate pages in the book—two page one's, two page two's and so on through

page ninety-five. Therefore any reference to a page number in this volume should designate not only the number of the page, but also the type of numeral, Roman or Italic, in which the page is numbered. To illustrate—See "Digest of Comments," Page 7 Italic, and "Proposed Report of the Secretary of the Interior," Page 3 Roman.

	Page		Page
LETTERS OF TRANSMITTAL	<i>1</i>	Water Supply—Continued	
Letter of July 24, 1947, from the Secretary of the Interior to the Speaker of the House of Representatives, transmitting the interim report	<i>1</i>	Available Water Supply in Upper Basin: Total Water Supply, Water Supply Available for Consumptive Use in Upper Basin, Hold-Over Storage Requirements in Upper Basin	<i>33-34</i>
Letter of July 23, 1947, from the Director of the Bureau of the Budget to the Secretary of the Interior, regarding the interim report	<i>1</i>	Available Water Supply in Lower Basin: Total Water Supply, Water Supply Available in Lower Basin for Consumptive Use in United States	<i>35</i>
Letter of July 19, 1947, from the Secretary of the Interior to the President, transmitting the interim report and the letters of comment	<i>1</i>	Quality of Water	<i>36</i>
Letter of July 17, 1947, from the Commissioner, Bureau of Reclamation, to the Secretary of the Interior, concerning the interim report	<i>2</i>	Water Requirements	<i>37</i>
COMMENTS OF STATES AND FEDERAL AGENCIES	<i>7</i>	Erroneous Use of "Stream Depletion" as Basis of Estimates	<i>39</i>
Digest of Comments	<i>7</i>	Water Requirements in Upper Basin	<i>39</i>
COMMENTS OF THE STATE OF ARIZONA	<i>15</i>	Water Requirements in Lower Basin: Water Requirements of Existing Projects, Water Deficit in Lower Basin	<i>39-42</i>
COMMENTS OF THE STATE OF CALIFORNIA	<i>19</i>	Potential Projects	<i>42</i>
Letter of Director of Public Works	<i>19</i>	Physical Works	<i>42</i>
Introduction	<i>19</i>	Water Utilization Studies	<i>45</i>
Colorado River Compact and Relevant Statutes, Decisions, and Instruments	<i>21</i>	Underground Storage	<i>45</i>
Analysis of Regional Directors' Report	<i>21</i>	The Silt Problem	<i>45</i>
"Scope and Purpose"	<i>22</i>	Electric Power	<i>47</i>
"Description of Area"	<i>23</i>	Economics of Potential Projects	<i>48</i>
"Problems of the Basin"	<i>23</i>	Review by State Department of Natural Resources	<i>51</i>
"Water Supply"	<i>24</i>	Concluding Comments	<i>51</i>
"Division of Water"	<i>25</i>	Recommendations	<i>52</i>
"Future Development of Water Resources"	<i>25</i>	COMMENTS OF THE STATE OF COLORADO	<i>55</i>
"Potential Projects"	<i>26</i>	Letter of Transmittal	<i>55</i>
"Summary of Annual Benefits and Costs of Potential Projects"	<i>27</i>	Summary of Comments, Views, and Recommendations	<i>55</i>
"Extended Benefits to the West and to the Nation"	<i>27</i>	Detailed Views and Recommendations	<i>57</i>
"Reimbursement and Flood Control Allocation"	<i>27</i>	Introduction	<i>57</i>
"Construction Program"	<i>28</i>	Inconsistent Treatment of Areas Outside of Natural Basin	<i>57</i>
"Conclusions"	<i>28</i>	Inconsistent Treatment of Out-Basin Projects in Utah and Colorado	<i>57</i>
"Recommendations"	<i>28</i>	As a Comprehensive Plan for Development the Report Is Incomplete and Misleading	<i>57</i>
Water Supply	<i>28</i>	Channel Losses in the Upper Basin Must Be Estimated and Used in Computation of Water Supply and Depletions	<i>58</i>
Stream Gaging Stations	<i>29</i>	Water Supplies and Depletions Should Be Presented in Terms Comparable to Those of the Colorado River Compact	<i>58</i>
Stream Flow	<i>29</i>		
Inadequacy of Estimates in Report	<i>30</i>		
Available Water Supply in Entire Basin: Basis of Estimates, Estimated Available Water Supply	<i>31-32</i>
