

THE COLORADO RIVER

MARCH 1946

The Colorado River

“A NATURAL MENACE BECOMES A NATIONAL RESOURCE”

*A Comprehensive Report on the Development of
the Water Resources of the Colorado River Basin for
Irrigation, Power Production, and Other Beneficial
Uses in Arizona, California, Colorado, Nevada, New
Mexico, Utah, and Wyoming*

By THE UNITED STATES DEPARTMENT OF THE INTERIOR

J. A. Krug, Secretary

SPONSORED BY AND PREPARED UNDER THE GENERAL SUPERVISION OF
THE BUREAU OF RECLAMATION

Michael W. Straus, Commissioner

E. A. Moritz, Director, Region 3; E. O. Larson, Director, Region 4

MARCH 1946

PROPOSED REPORT OF THE SECRETARY OF THE INTERIOR		
Letter of June 6, 1946, from the Acting Commissioner, Bureau of Reclamation	3	
REGIONAL DIRECTORS' REPORT		
Map of Colorado River Basin	Facing 9	
Scope and Purpose	9	
Authority for the Report	9	
Cooperation and Acknowledgments	9	
Description of Area	10	
Problems of the Basin	11	
Water Supply	12	
Division of Water	13	
Future Development of Water Resources	13	
Table I, Present and Potential Stream Depletions in the Colorado River Basin	14	
Potential Projects	14	
Table II, Potential Projects in the Colorado River Basin	15	
Table III, Potential Irrigation Development	18	
Table IV, Potential Power Development	18	
Summary of Annual Benefits and Costs of Potential Projects	18	
Extended Benefits to the West and to the Nation	18	
Reimbursement and Flood Control Allocation.	19	
Construction Program	20	
Related Investigations	20	
Conclusions	21	
Recommendations.	21	
SUBSTANTIATING MATERIAL		
FOREWORD	25	
<i>Chapter I. THE NATURAL SETTING</i>	29	
Physical Characteristics	31	
Geological History	39	
Native Plant and Animal Life.	39	
Climate	41	
<i>Chapter II. CLAIMING THE BASIN</i>	43	
Primitive Peoples	45	
Explorations		46
Settlement		48
Population		49
<i>Chapter III. DIVIDING THE WATER</i>		53
Virgin Conditions		55
Early Development of the River.		56
Summary of Conditions in the Early 1920's		59
Between the Upper and Lower Basins		59
Between United States and Mexico		66
<i>Chapter IV. DEVELOPING THE BASIN</i>		69
Upper Basin		72
Labor Force		72
Land Ownership and Use		73
Soils		73
Agriculture		73
Minerals and Mining		80
Lumbering		85
Manufacturing		86
Transportation and Markets		86
Recreation		87
Lower Basin		89
Land Use		89
Agriculture		91
Minerals and Mining		95
Manufacturing and Other Industries		97
Markets and Transportation		98
Wholesale and Retail Trade		99
Recreation		100
Summary—Colorado River Basin		101
<i>Chapter V. USING THE WATER</i>		105
Upper Basin		107
Green Division		109
Present Development of Water Resources		109
Potential Development of Water Resources		113
Grand Division		124
Present Development of Water Resources		125
Potential Development of Water Resources		130
San Juan Division		139
Present Development of Water Resources		140
Potential Development of Water Resources		142
Summary—Upper Basin		150

Lower Basin	Page 152	Forest Service	Page 271
Little Colorado Division	152	National Forests and Reclamation in the Colorado River Basin	271
Present Development of Water Resources	154	Federal Power Commission	273
Potential Development of Water Resources	155	Power Resources of the Upper Basin	273
Virgin Division	157	Power Resources of the Lower Basin	274
Present Development of Water Resources	158		
Potential Development of Water Resources	159	Appendixes	
Boulder Division	161	Appendix I. Water Supply, Colorado River	279
Present Development of Water Resources	164	Index to Projects, Existing and Potential	287
Potential Development of Water Resources	168	Index to Reservoirs and Reservoir Sites	291
Gila Division	172	Appendix II. Eleven Maps	295
Present Development of Water Resources	174		
Potential Development of Water Resources	179	Photographs	
Summary—Lower Basin	183	Frontispiece (Grand Canyon, Arizona)	Facing 3
Summary—Colorado River Basin	184	Boulder Dam	24
<i>Chapter VI. POWER FROM WATER</i>	187	Junction of the Green and Colorado Rivers	32
Upper Basin	189	Bow-Knot of the Colorado River	32
Present Power Development	190	Black Canyon of the Gunnison River	35
Power Market Survey and Load Trend	193	Goosenecks of the San Juan	37
Potential Power Development	195	Long-range view, Grand Canyon	37
Summary	196	Desert flora	40
Lower Basin	197	Desert scene	40
Power Area	197	Canyon country	47
Present Power Development	198	Yuma project, an early reclamation development on Colorado River	57
Power Market Survey and Load Trend	202	Near Lee Ferry, the dividing point	61
Potential Power Development	204	Herefords on the range near Moab, Utah	75
Summary	205	Hay harvest on Eden project, Wyoming	75
Summary—Colorado River Basin	206	Peach orchard near Grand Junction, Colorado	77
		Tomatoes from Grand Valley project	77
<i>Chapter VII. WEALTH FROM WATER</i>	209	Coal mine near Sunnyside, Utah	81
Benefits to the West and to the Nation	213	Lead-silver mine	81
Summary of Costs, Benefits, and Repayment	218	Gold mine	81
		Utah Oil Refining Company	82
<i>Chapter VIII. COOPERATING INTERESTS IN THE BASIN</i>	221	Outdoor life	87
Geological Survey	223	Rod and reel	88
Quantity and Quality of Water	223	Milch cows in irrigated pasture	90
Upper Basin	224	Irrigated sugar beets grown for seed	90
Lower Basin	232	Winter vegetables for Eastern markets	92
National Park Service	238	Skiing on Surveyor Peak	101
Water Utilization Program	239	Angler's pride	101
Summary	249	Hives of bees in date grove	102
Fish and Wildlife Service	250	Attractive home on irrigated farm	102
Upper Colorado Basin	250	Parker Dam	119
Lower Colorado Basin	252	Main canal, Salt River project	119
Recommendations	253	Colorado River Diversion Dam	127
Grazing Service	254	Grand Valley power plant	127
Objectives and Functions	254	Grand Valley Canal	127
Grazing Districts in the Colorado River Basin	256	Taylor Park Dam in Colorado	129
Bureau of Mines	258	Fishing at Green Lakes resort	129
Program of Water Utilization	258	Vallecito Dam	141
Low-cost Power and Mineral Development	259	Vallecito Reservoir	141
Office of Indian Affairs	261	Imperial Dam and desilting basins on Colorado River	165
Indian Projects in the Colorado River Basin	261		
General Land Office	268		

CONTENTS

	Page
All-American Canal	165
A site is found	169
A dam is planned	169
Pumping ground water	175
Roosevelt Dam on Salt River	177
Bartlett Dam on Verde River	177
Downtown Los Angeles	199
Goodyear Tire and Rubber Company, Los Angeles	199
Citrus groves	212
Yuma cantaloupes	215
Prize produce	215
Cattle on mountain range	255
Irrigated hay fields	255
Cottonwood Camp, Big Piney, Wyoming	272
Hauling logs, Ashley National Park	273

MAPS IN APPENDIX II

Water resources development, Colorado River Basin:	
Arizona	Following 291
California	Following 291
Colorado	Following 291
Nevada	Following 291
New Mexico	Following 291
Utah	Following 291
Wyoming	Following 291
Principal power systems, existing and potential, Colorado River Basin	291
Conservation areas and facilities, Colorado River Basin	291
Mineral resources, Colorado River Basin (two maps)	Following 291

TABLES

I. Weather records at representative stations, Colorado River Basin	42
II. Population growth in the Colorado River Basin	49
III. Estimated virgin flows in the Colorado River Basin	55
IV. Irrigation development in the Colorado River Basin (1922)	57
V. Labor force in selected employment groups in upper basin (1939)	72
VI. Supplemental employment of farmers in upper basin (1939)	72
VII. Types of farms in upper basin (1939)	73
VIII. Value of farm products sold or traded in upper basin (1939)	74
IX. Livestock in upper basin (1939)	74
X. Yields of major crops in upper basin (1939)	76
XI. Number of farms in the upper basin	76
XII. Sizes of farms in upper basin (1939)	76
XIII. Farm land available in upper basin (1939)	79
XIV. Value of farm property in upper basin (1939)	79
XV. Average income from farms in upper basin (1939)	79
XVI. Coal production in upper basin	80
XVII. Mineral production in upper basin	83
XVIII. Manufacturing census data—upper basin	86
XIX. Value of trade in upper basin (1939)	87
XX. Number and size of farms in lower basin	93
XXI. Irrigated farm acreage in lower basin	94
XXII. Value of farm lands and buildings in lower basin	94
XXIII. Value of agricultural products in lower basin (1939)	95
XXIV. Gross value of principal metals mined in lower basin	97

	Page		Page
XXV. Natural gas and petroleum produced in southern California (1942)	97	LVI. Average annual stream flows in the San Juan division	140
XXVI. Manufacturing census data—Lower basin and southern California (1939)	99	LVII. Reservoirs in San Juan division	142
XXVII. Wholesale and retail trade—Lower basin and southern California (1939)	99	LVIII. Present irrigated areas in the San Juan division by States	143
XXVIII. Expenditures in trade—Lower basin and southern California (1939)	100	LIX. Estimated present average annual water consumption San Juan division	143
XXIX. Average annual stream flows in the Green division	109	LX. Estimated present average annual water imports into San Juan division	143
XXX. Irrigation reservoirs in the Green division	111	LXI. Estimated present average annual water exports from San Juan division	143
XXXI. Present irrigated areas in Green division by States	112	LXII. Potential projects in the San division	147
XXXII. Estimated present average annual water consumption in Green division	112	LXIII. Potential reservoirs in San Juan division	148
XXXIII. Estimated present average annual water exports from Green division	112	LXIV. Potential irrigation development in San Juan division	148
XXXIV. Potential projects in the Green division	120	LXV. Potential irrigation developments in San Juan division by States	149
XXXV. Potential reservoirs in Green division	121	LXVI. Potential power development in San Juan division	149
XXXVI. Potential irrigation development in Green division	122	LXVII. Potential import diversions to San Juan division	149
XXXVII. Potential irrigation development in Green division by States	123	LXVIII. Potential export diversions from San Juan division	149
XXXVIII. Potential power development in Green division	123	LXIX. Present and potential stream depletions in San Juan division	150
XXXIX. Potential export diversions from Green division	123	LXX. Present irrigated areas in upper basin	150
XL. Present and potential stream depletions in Green division	124	LXXI. Present hydroelectric generating capacity in upper basin	151
XLI. Average annual stream flows in the Grand division	124	LXXII. Potential development of water resources in upper basin	151
XLII. Irrigation reservoirs in the Grand division	128	LXXIII. Present and potential stream depletion in upper basin	151
XLIII. Present irrigated areas in the Grand division by States	128	LXXIV. Average annual stream flows in the Little Colorado division	152
XLIV. Estimated present average annual water consumption in Grand division	130	LXXV. Existing reservoirs in Little Colorado division	155
XLV. Estimated present average annual water exports from Grand division	130	LXXVI. Present irrigated areas in the Little Colorado division	155
XLVI. Potential export diversions from Colorado River above Gunnison River	132	LXXVII. Estimated present average annual depletions in Little Colorado division	155
XLVII. Potential export diversions from Gunnison River	133	LXXVIII. Potential projects in Little Colorado division	156
XLVIII. Potential projects in the Grand division	135	XLXXIX. Potential reservoirs in Little Colorado division	156
XLIX. Potential reservoirs in Grand division	136	LXXX. Potential irrigation development in Little Colorado division	156
L. Potential irrigation development in Grand division	137	LXXXI. Present and potential stream depletions in Little Colorado division	156
LI. Potential irrigation development in Grand division by States	137	LXXXII. Average annual stream flows in the Virgin division	158
LII. Potential power development in Grand division	138	LXXXIII. Present irrigated areas in the Virgin division	159
LIII. Potential diversions to San Juan division	138	LXXXIV. Estimated present average annual depletion in Virgin division	159
LIV. Potential export diversions from Grand division	138	LXXXV. Potential projects in the Virgin division	160
LV. Present and potential stream depletions in Grand division	138
