THE INTERIOR**

**BUREAU OF
RECLAMATION**

Specifications No. 519

**UNITED STATES
DEPARTMENT OF THE INTERIOR
RAY LYMAN WILBUR, Secretary
BUREAU OF RECLAMATION
ELWOOD MEAD, Commissioner**

SPECIFICATIONS, SCHEDULE, AND DRAWINGS

**HOOVER DAM, POWER PLANT
AND
APPURTENANT WORKS**

**BOULDER CANYON PROJECT
ARIZONA-CALIFORNIA-NEVADA**

Bids will be received at the office of the Bureau of Reclamation, Denver, Colorado, until
10 o'clock a. m., March 4, 1931.

CONTENTS

	Page		Page
Schedule.....	1-10	Special conditions—Continued.....	
Statement of equipment.....	11	35. Drinking water at site of works.....	24
Statement of electric power requirements.....	12	36. Electric power for construction purposes.....	25
SPECIFICATIONS		37. Sand and gravel deposits.....	26
General conditions:		38. Roads and highways, general.....	27
1. Performance bond.....	13	39. Construction highway.....	27
2. Mongolian labor prohibited.....	13	40. Construction railroad.....	27
3. Climatic conditions.....	13	41. Transporting Government freight from construction railroad to power house.....	29
4. Rights of way.....	13	42. Use of inclined freight elevator by contractor.....	30
5. Quantities and unit prices.....	13	43. Acceptance of cofferdams by Government.....	30
6. Staking out work.....	13	44. Development of power prior to completion of dam.....	31
7. Bench marks and survey stakes.....	13	Earthwork:	
8. Data to be furnished by contractor.....	13	45. Stripping canyon walls of loose rock.....	31
9. Sanitation.....	13	46. Classification of excavation.....	32
10. Extras.....	13	47. Lines and grades.....	32
11. Cleaning up.....	14	48. Blasting.....	33
12. Failure of Congress to appropriate funds.....	14	49. Open-cut excavation, general.....	33
13. Patents.....	14	50. Preparation of rock foundations for the dam and other structures.....	33
Special conditions:		51. Tunnel, adit, and shaft excavation, general.....	34
14. The requirement.....	14	52. Temporary timbering in tunnels.....	35
15. Description of diversion works.....	14	53. Steel ribs and steel liner plates in tunnels, adits, and shafts.....	35
16. Description of dam.....	15	54. Open-cut excavation for diversion tunnels.....	35
17. Description of spillways.....	15	55. Excavation of diversion tunnels.....	36
18. Description of outlet works.....	15	56. Care of river and unwatering foundations.....	36
19. Description of power plant.....	16	57. Removal of downstream cofferdam and rock barrier.....	37
20. Description of inclined freight elevator.....	16	58. Common excavation for foundations of dam, power house, and cofferdams.....	37
21. Description of highway.....	17	59. Rock excavation for foundation of dam.....	38
22. List of drawings.....	17	60. Excavation for upstream cut-off trench in foundation of dam.....	38
23. Preference rights of ex-service men and citizens of the United States.....	19	61. Excavation for spillways, in open cut.....	38
24. Commencement, prosecution, and completion of work.....	19	62. Excavation of inclined spillway tunnels.....	39
25. Liquidated damages.....	19	63. Excavation for canyon-wall valve houses.....	39
26. Construction program.....	20	64. Excavation for intake towers.....	39
27. Materials furnished by the Government.....	20	65. Excavation of shafts for outlet works and connecting galleries.....	39
28. Materials to be furnished by the contractor.....	21		
29. Preference for domestic articles or materials.....	22		
30. Foundation and other test drilling records.....	22		
31. Report on geology.....	22		
32. River discharge records.....	22		
33. Approval of plans by Colorado River Board.....	23		
34. Use of Boulder City as camp site.....	23		

Earthwork—Continued

66. Excavation of penstock tunnels, outlet tunnels, and power penstocks.....	39
67. Rock excavation for power house.....	40
68. Excavation for switching station.....	40
69. Excavation for inclined freight elevator structures.....	40
70. Excavation for highway.....	40
71. Excavation for highway structures.....	41
72. Back fill for power house.....	41
73. Back fill for switching station.....	41
74. Back fill on roofs.....	42
75. Embankment construction, general.....	42
76. Borrow pits and quarries.....	43
77. Rock fill in diversion cofferdams.....	43
78. Rock protection.....	43
79. Rock blanket on upstream cofferdam.....	44
80. Rock barrier below downstream cofferdam.....	44
81. Earth fill in cofferdams.....	45
82. Rubble masonry walls.....	45
83. Disposal of excavated materials.....	46
Grout and drainage systems:	
84. Drilling grout holes in tunnels, adits, and shafts.....	47
85. Drilling grout holes in foundations for dam and spillway crests.....	47
86. Drilling drainage holes in foundation for dam.....	48
87. Pressure grouting, general.....	48
88. Pressure grouting in tunnels, adits, and shafts.....	49
89. Pressure grouting in foundations for dam and spillway crests.....	49
90. Contraction joints in dam.....	50
91. Pressure grouting contraction joints in dam.....	50
92. Anchor bars in rock.....	51
93. Porous concrete tile drains in dam.....	51
Roofs:	
94. Tile roofs.....	52
95. Asphalt saturated felt roofing.....	52
Concrete:	
96. Composition.....	53
97. Cement.....	55
98. Sand.....	55
99. Broken rock or gravel.....	56
100. Cobble rock.....	56
101. Samples of concrete aggregates.....	57
102. Water for mixing.....	57
103. Mixing.....	57
104. Temperature of concrete.....	58
105. Forms.....	58
106. Placing.....	58
107. Finishing.....	60

Concrete—Continued.

108. Protection.....	60
109. Damaged or defective concrete.....	60
110. Reinforcement bars and rails.....	61
111. Measurement of concrete.....	61
112. Payment for concrete.....	61
113. Concrete linings in tunnels, adits and shafts.....	61
114. Concrete linings, walls and slabs against rock in open cut.....	62
115. Concrete in inlet structures for inner diversion tunnels.....	63
116. Concrete in inlet structures for outer diversion tunnels and bulkhead gates.....	63
117. Concrete in outlet structures for diversion tunnels.....	63
118. Concrete in linings of diversion tunnels.....	64
119. Concrete in paving for upstream cofferdam.....	64
120. Concrete in dam.....	65
121. Cooling concrete in dam.....	65
122. Concrete in parapets.....	66
123. Special finishing of walls in power house, parapets and other concrete surfaces.....	67
124. Concrete in spillway structures.....	68
125. Concrete in linings of inclined spillway tunnels.....	69
126. Concrete in diversion tunnel plugs.....	69
127. Concrete in outlet and penstock tunnels.....	69
128. Concrete in linings of shafts for outlet works and connecting galleries.....	70
129. Concrete in canyon-wall outlet works.....	70
130. Concrete in intake towers, foundations, and superstructure.....	70
131. Concrete in bridges to intake towers.....	70
132. Concrete in power house and penstocks.....	71
133. Concrete for switching station and steel tower footings.....	71
134. Concrete in inclined freight elevator structures.....	71
135. Concrete in highway structures.....	71
136. Gunite surfacing on concrete.....	73
137. Rough finish for tile floors.....	74
138. Cement mortar finish for concrete floors.....	74
139. Thin walls of metal lath and plaster.....	75
Metal work and painting, general:	
140. Installing metal work.....	76
141. Weights of machinery and metal parts.....	76
142. Painting.....	76

Pipes and structural steel:

	Page
143. Standard steel and cast-iron pipe, fittings, and valves.....	77
144. Pipe handrailing.....	77
145. Pipe for grouting tunnels, adits, and shafts.....	78
146. Pipe for grouting foundations for dam and spillway crests.....	78
147. Pipe for grouting contraction joints in dam.....	79
148. Pipe for draining foundation of dam..	79
149. Pipe for cooling concrete.....	80
150. Control piping for high-pressure gates..	80
151. Metal pipe for highway drains and culverts.....	81
152. Conduit lining castings.....	81
153. Plate-steel conduit linings for outlet works.....	82
154. Plate-steel conduit linings for power penstocks.....	82
155. Structural steel, general.....	83
156. Structural steel for bridges.....	84
157. Trash rack metal work.....	84
158. Steel sheet piling for upstream cofferdam.....	85
159. Track rails.....	86
160. Metal work in inclined freight elevator guide structure.....	86

Pipes and structural steel—Continued.

	Page
161. Metal floor plates.....	86
162. Metal stairways.....	86
Gates and other mechanical machinery:	
163. Stoney gates and hoists.....	86
164. High-pressure, hydraulically operated gates.....	87
165. Cylinder gates and hoists in intake towers.....	88
166. Needle valves.....	88
167. Traveling cranes.....	89
Electrical installations:	
168. Electrical equipment, general.....	89
169. Resistance thermometers.....	89
170. Electrical conduits.....	90
Windows, doors and other miscellaneous items:	
171. Metal-sash windows and partitions..	90
172. Metal-sash window operators.....	91
173. Metal swing doors.....	91
174. Metal rolling doors.....	91
175. Wooden doors.....	91
176. Hollow tile.....	91
177. Ceramic-tile walls and floors.....	92
178. Plumbing and hardware.....	92
179. Steel partitions.....	93
180. Sheet metal work.....	93
181. Temporary end walls in power house..	93
182. Miscellaneous items of metal work...	94
