

ARRIVED MAY 2 1988

April 30, 1988

Hello;

My Sis and I are doing research on our family. We were told that a Paul Leland Jordan died while working on a dam in the west. We think it may have been Boulder Dam (can't get use to the name change) He died on November 1, 1931.

We were wondering if you would have that information as to who died while working on the dam? Also, if he was there we would like other information regarding the dam such as when built and how long and etc. We think we had another uncle who worked there also maybe two. One was Cecil Aaron Jordan and the other Bob D. Jordan but we are not positive just a vague memory.

We would appreciate any help you might be able to give us or if you would give this to someone who could help.

Thank you,

*Hattie Shacklett*
