

MULHOLLAND PLANS TO DIVERT THE COLORADO

Los Angeles Aqueduct Engineer
Seeks New Water Supply for
Southern California

The visit to Las Vegas last week of William Mulholland, chief engineer of the Los Angeles Bureau of Water Works and Supply, was not, it appears, a preliminary to the more detailed study of the proposal to divert a portion of the water from the Boulder Canyon Dam, when built, to Los Angeles.

The Los Angeles Times of October 25 says:

"Following the recent inspection trip of Chief Engineer Mulholland of the Bureau of Water Works and Supply to the Colorado River, the Board
