

Edenwold

Edenwold

The Ward-Belmont Farm
and Country Club

Recent
improvements
add to the
charm
of the spacious
old Southern
residence

IN addition to the main campus, Ward-Belmont has recently acquired Edenwold, a farm of 600 acres, in the beautiful blue grass region near Nashville. The farm-house—over 100 years old—has been recently remodeled and will be

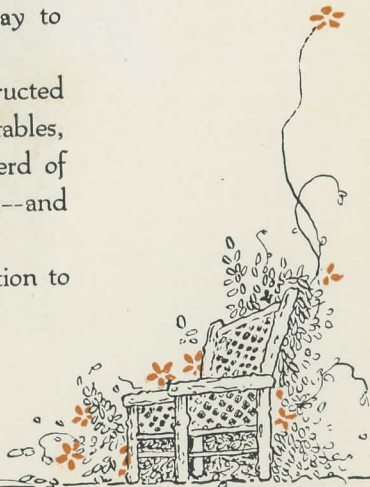

used as a country club house for the students.

Wide porches, spacious halls and rooms, big open fireplaces, artistic pergola, and beautiful grounds make it admirably adapted for general outings of the school and “week-end” parties of the various clubs and classes. Tennis Courts and Golf Course are to be constructed. Saddle ponies will be at the disposal of the students. On the grounds there is a lovely lake already well stocked with fish, and on the adjacent river canoes and launches (in charge of experienced boatmen) will be a further source of pleasure. The acquisition of this magnificent farm will contribute in a wonderful way to the pleasures already provided for Ward-Belmont girls.

The farm has a practical side as well. Thoroughly equipped with improvements—well-constructed barns, water system, and machinery—Edenwold has been termed a model farm. Fresh vegetables, fruit, poultry, etc., will be brought each day to the school for the table. With the splendid herd of milch cows an abundance of rich milk and cream is assured. Every provision is made for sanitation—and in addition the premises and herds are regularly inspected by dairy and food authorities.

This new possession marks an innovation, and Ward-Belmont feels proud of its latest addition to its already elaborate equipment. Catalogue and other literature will be mailed upon request.

Ten miles from the school, Edenwold is easily accessible by street car, train and automobile
