

ing, "Just let me tell you! Is something wrong with me?"

But wait, what's all the excitement about now? Oh, it's only Betty Brothers. She hasn't calmed down since she published her new best seller, How To Deflate The Male Ego or The Benefits of Misanthropy. Ellen Wills has certainly caused quite a sensation herself. Everyone is congratulating her on having won a Nobel prize for revolutionizing the entire cosmetics industry by creating a new vanishing cream which removes freckles instantly.

We are very disappointed to find that several members of the class of '54 couldn't be present at the reunion. Mary Faith Templeton never gets back to Nashville any more since she became such a hit on Broadway as "Cyrano". And in Paris, they say that Gene Jarman and Anne Mashburn are almost penniless from spending so much money on make-up since they joined the Folies Bergers. Allister McDougall is also in Paris where she operates a tremendous gambling cassino called "Maxines". They say it's modeled after the famous Celtic room which Allister was always fond of. Cornelia Faust was also unable to be at the reunion because of her T.V. program. She has taken Clara-bell's place on the Howdy Doody show now. Cornelia was always a little "Corny". It looks like Sandy Sutherland has at last been cured of her warm naturedness. One night recently she forgot her glasses and climbed into the deep freeze instead of her bed. She's in the hospital now with double pneumonia.
