September 11, Action

On Sept, 11 of 2001, I was in class with my science teacher Miss. Beemen, 1st period when the Monitor was turn on by the parent affeist. The teacher jumped up and got to turn around as fast as she can go because the T.V. was so loud it speaked the hound class. After that happen she told everyone to stop with they were doing.

When the teachers eyes start to turn red a water was covering down her cheek. That was the area that had the area of the area. That which the to, avoid every body just put there head down.

Me say the picture that the twin towers were not standing. That what change me for all I know.
