

Well, when all of that happened, I was at school, there was this big comotion in class! I think it was my second period class, my teacher was Mr. Ramos and our next door neighbor was Mrs. Rodriguez, she was the one that told us all about it. My friends were shocked just as bad as I was. My thoughts were that maybe it was war. I thought they were going to attack Texas and we were all going to die. Thats what I thought, but luckily nothing else bad happened.
