

September 11th

The september eleventh attack is something this nation will never forget. That day has terrified me for life, I will never forget it. That day was like any other day for me and my friends, just messing around in class. When I first heard what was going on I was in my second period class Mr. Ramos, When Mr. Ramos are assistant principle came on, on the intercom and said "I regret informing you, but terrorists have attacked the world trade buildings". After he said that it was dead silent. It seemed that the whole was empty. Then I new we were going to war.
