Dear Mary Sue,

It was great to talk with you on the phone yesterday. As I told you, I am putting together a computer data base of relatives and would like to include all of the descendants of Daniel Webster Lambert, right down to the living generations today. I would so greatly appreciate your help in this endeavor. Enclosed, you will find:

Descendant Chart of William Otterbein Lambert

An Individual Data Chart for each person on the above mentioned chart.

Descendant Chart of Bertha Elizabeth Lambert, so you can see where I fit in.

Descendant Chart of Daniel Ira Lambert, this being my weakest line since he had two daughters and I haven't any clue to their families other than the Hamiltons may have lived in Cincinnati. I believe you said that Bernice has some knowledge of them. Any help you could be in putting me in touch with someone in that branch would be greatly appreciated.

A four generation Pedigree Chart, starting with your grandfather, William Otterbein Lambert.

A few photos you may be able to help me with.

As you go through each chart, confirm or correct the information I have entered and fill in any missing information that you can. Don't overlook middle names or the names of counties for the place fields, if you know them. Any narrative comments you wish to add to the notes would be appreciated also and will be entered into the computer. There is a lot missing and probably inaccurate since I got most of the information from Pauline's work. I am beginning to store Social Security Numbers for those people who have them since they will be a valuable means of identification to future genealogists. If the people you are working on don't mind it would be good to include them.

Hope to hear from you soon,
