Today we had a low reading of 21° with a high of about 54°. No doubt a lot of our fruit has been killed. It continues to stay dry. Since Sept. 22nd which is seven months we have had only 4.78 inches of rain. Our normal yearly rain fall for 12 months is about 30 inches. Belvid said that the Red Breasted Nuthatch was back at the suet feeder again today.

Today was a beautiful day for birding. I am surprised that I didn't turn out with a better list than I did. I banded 5:45 AM till 9:30 AM with Si Rositzky, John Hamilton, Bob Brown and Bobson-in-law John Scott. I banded by myself then 9:30 AM till afternoon and then all afternoon till 7:30 PM with Si Rositzky and Mr. + Mrs. Jack Saferstein. ~~the~~ The day was clear and nice. The temperatures were low about 50° high about 80°.

This was a very unusual day. The morning up until ~~about~~ about 1 P.M. was mostly clear & hot. At about 1 P.M. the wind switched to the north, it turned cloudy and got very chilly with a bit of rain. Ed Roberts, Jim, Jim Jarley & I birded 6 a.m. till 9:30 a.m. at Long Park, Lake Contrary, Mud Lake and Muskrat Lake. 9:30 a.m. until 12 Noon Pearl & I birded east of town in the 102 river bottoms and in timber along Northwest boulevard. Pearl, Sig & I then birded 1 P.M. till 7 P.M.

here through Honey Creek to Squaw Creek & back. Squaw Creek is ~~not~~ in a pitiful state. The main pool is just about completely dry. The only water is in the west end pools where the water has been diverted from Squaw Creek. Actually we probably saw at least 5,000 shore birds at Squaw Creek but most of them were at a distance which made them hard to identify. I believe that the majority of them were ~~semi~~ semipalmated Sandpipers, Pectorals and pipers and lesser yellow legs. We probably misidentified some species.

This was no doubt the biggest day in my
birding career. Si Rositzky and I started out
at 8:45 am in the rain. We thought that

it was going to be a poor day because it was cloudy and rainy at the time. We usually start at Krug Park with a walk but because of the rain we decided to take a drive out the Mitchell Avenue Road and then my regular drive near the Wier. From there we covered the N.W. Blvd. area where we came across John & Julie Hamilton. They had been at Krug Park and from there we went to Krug Park. From K.P. we went to Honey Creek and then on to Squaw Creek. at S.Q. Si and I finally met up with John & Julie Hamilton, Hugh & Sally Sprague and Dale Flowers. We finally got home at 9 PM. tired but happy. Si and I wound up with 143 species. John & Julie had enough that Si and I missed that I believe the group had probably 160 species. The afternoon turned off clear & warm. Temperatures were low about 62° high about 83°.
