Arctic Loon

[illegible]

COMMENTS:

Pearl and I first saw this bird at Browning Lake near our airport about 4 P.M. on the afternoon of October 19, 1969. It wasn't until I got home and checked all the identifying marks in my book that I realized that it was an Arctic Loon. It was the second sight record of the bird for Missouri and as it was collected on the afternoon of Oct 23 and it is the first positive record for Missouri. The most wonderful thing about it is that the bird is in breeding plumage. I call Waverly Easterla and kept to Pearl and I he was the first to see the bird. Next in order comes Don Reynolds, John Hamilton, Julie Hamilton, Stanley Novak, Si Rositzky, Hugh Sprague, Sally Sprague and Bob Brown. Waverly Easterla and I worked every day except Wednesday in trying to collect the bird. Finally on Thursday Oct 23rd. Waverly killed it with a 16 gauge shotgun. He and I will prepare a paper on the bird jointly and have it published in the "Arch" we hope.
