Bronzed Cowbird

COMMENTS:

The Bronzed Cowbird ♂ at a feeder in a mixed flock of blackbird outside the Office at the Squaw Creek N.W.R. is my most surprising sighting of any bird that I have seen in Missouri. This excludes birds such as Whooping Crane, yellow Rail, Black Rail, Purple Gallinule & many others. Berlin Hecht, the refuge mgr. was the first to see and identify the bird. He then called Mark Robbins and me. I called Leo Galloway We were all able to see it at about 20 feet distance and study it at our leisure

Rose-breasted Grosbeak

COMMENTS:

The 11/3/73 was a good close observation of a ♂ in pretty good plumage along the Monkey Mountain road just a short distance northwest of the area now designated as the Monkey Mountain Wildlife area. It was in a tree in a low area alongside a small creek.

Black-headed Grosbeak

Black-headed Grosbeak

COMMENTS:

The listing here 5/6/73 was of a male just about 8 to 10 feet above the heads of myself (F.L.) and Simon Rostzbay. No doubt about it at all. We observed it for at least a full minutes a very close range.

Blue Grosbeak

Painted Bunting

COMMENTS:

I just heard during early December 1985 from Don Reynolds that he and his wife Maudie observed a ♂ & ♀ Painted Buntings near the asphalt trail in the Bluff woods State Forest south of St. Joseph in early May 1985. I know from experience that Don has seen many Painted Buntings in Texas & knows them well.

Hoary Redpoll

COMMENTS:

I know the record of this bird is questionable. I did have a good look at the bird and could see that it was easily distinguishable from a few common Redpolls with which it was feeding. Pictures of the bird studied by two Ornithologists who had worked with them in Alaska and they both stated that it was a Hoary Redpoll. When I saw the bird I had not heard that the bill of the Hoary is smaller than the common so I can't argue that point. The bird was captured, banded and released
