Now that I have gone back to work and all vacations are over I plan to bird again on my noon hour. Weather should be cooler also. Today was cloudy & cool all day. A heavy rain this evening of about 2 inches. Robins are beginning to flock grow in the woods and along the boulevard. Two or three days lately has also moved out quite a number of other birds such as Mocking Hoes and King Birds. It should also bring in more of the warblers and Vireos. 66° high 88°

Wade Easterla who has over 500 North American birds on his life list has never seen one so I hurried home & called him. He had a Faculty Banquet to attend this evening which he couldn't get away from so he agreed to meet me at the Wholesale at 6:00 A.M. tomorrow. Wade is teaching Biology this year at Northwest Missouri State Teachers College at Maryville, Mo.

As pre arranged I met Dave Easterla at the Wholesale house at 6 a.m. In 10 minutes we

were at the field where I have been seeing all of the shore birds. It was cloudy and foggy. Visibility was very poor. I have tramped around through the muddy field for nearly an hour and was about ready to give up when the Buff-breasts flew by him and dropped into the green. I have has a State and Federal collectors permit so he shot one of the birds to add to the collection that he is using at Maryville in teaching a course in ornithology. Today was clear and hot from about noon on. This evening John Hamilton saw a bird that he couldn't identify. He thought that it could possibly be a Ruff. I went back with him about 30 minutes later but no luck.
