32 Ibis (Surely white faced) 1

AP

30 Swamp Sparrow 3

LC

31 Song Sparrow 6

LC

Today was clear and nice. The temperatures were low 46° high 77°. This morning Pearl + I drove over to Browning Lake at the Airport and saw the Ibis again. It was quite a ways off. I then went to Airport head quarters + called the News Press + left a message there for Joel and then Pearl + I went down and made a round of the lakes. Then this evening Ken Jackson picked me up + we went to the Airport. We could faintly see the Ibis from the bridge but after walking nearly half a mile down the lake shore we couldn't find the bird. I don't think Ken is going to count it because he could not get a good clear look at it.

Today was cloudy, damp & rainy all day. The temperatures were low 44° high 62°. This morning I went with Larry up to Camp Sieger, the Boy Scout camp for this area. Larry took his metal detector just to see what he could find. We stayed until about noon and finally came home because of the rain.

Today was clear, cold A.M. and generally a beautiful day all day. We really had a heavy frost this morning. Temperatures were low 28° high 50° Pearl & I made the rounds this morning of the lakes around town and then this afternoon Ken Jackson and I made the same rounds. It was Ken and I who saw the Prairie Falcon this afternoon at Horseshoe Lake at about 3:45 P.M. We saw it flying over head. We watched it for at least 5 minutes. One time it flew directly overhead

Today was cloudy, rainy and cold all day long.

The temperatures were low 32° high 44°  
 We went to Lake Cojoc on a sport trip this  
 afternoon. I would have liked to have gone to the  
 Airport but the wind was in the east and the  
 rain would have blown in when I lowered the  
 window to use my telescope.

Today was clear and cold. The temperatures were low  $34^{\circ}$  high  $45^{\circ}$ . When we got up this morning we had a small shift of snow on the ground. They had as much as 7 inches of snow in some parts of Iowa + Nebraska. Pearl + I took a short ride before noon over to the Airport and to Lake Contrary. We were just eating lunch about 12:45 when Tim Barbsale called in. He had an old truck in Maryville, Mo. He had picked it up + was headed back for Columbia when it stopped on him out near Maysville, Mo. I was the only one anywhere near by so he called me to come + get him. His truck had been towed to a garage in Maysville, Mo. I picked him up there + brought him back to St. Joseph where he took a bus to get home to Columbia, Mo.

Today was clear, cool and real nice. The temperatures were low 37° high 62°. I picked Ken Jackson up this morning at 6:30 AM and we headed for Perry Lake out in Kansas. It was a real enjoyable day. There were lots of birds and the weather was wonderful. I got back home this evening at 5:40 P.M. I drove a total of 205 miles for the day. Ken really enjoyed it. The Common Loon and Western Grebe were life birds for Ken.

Today was clear, cool & nice. The temperatures were low 36° high 62°. Pearl & I took a short drive this morning to Browning Lake at the Airport and to Lake Contarry. This afternoon we left home at 1 P.M. & drove to Squaw Creek. We stayed there until dark this evening. I was most happy to see the Peregrine Falcon which is on the endangered species list. Berlin Heck who was driving ahead of me first saw the bird and pointed it out to me.

Today was clear and warm. The temperatures were low 40° high 76°. Leo Galloway called me this morning & suggested we go out for awhile this a.m. to see what was stirring. We left home about 8:30 a.m. & was back about noon. Birds except for a small pocket at Bluff Woods were almost non-existent. The crows at home just before dark were milling around looking for a roosting spot. I think they dropped in along the boulevard

Today was clear + warm. The temperatures were low 41° high 75°. I stayed home all day. I was down in the dumps all day. On about Tuesday Oct 28th a Red throated Loon was seen at Alton Dam. Tim Barbsdale called me on Thursday evening Oct 29th to tell me about the bird. I had already made plans on going to Perry Lake on Saturday with Kenneth Jackson. I told him if some one else from here would go during the night Thursday + come back home Friday nite, then I would go but I didn't want to go back on my plans for Perry Lake. I wound up not going. Sunday nite Nov 2nd Dave Eastola called me + said he had talked to Dick Anderson at St. Louis and that the bird was still there. He couldn't go before Thursday nite or Friday AM. He was to call me last night and if the bird was still there then himself, Leo Dalloway and I would about 2 AM Friday. I didn't hear a thing until a while ago. The bird was still there yesterday but he didn't know until this evening. He is to get a call tomorrow noon from Dick. If the bird is still there

then he, Les and I will leave here about 3 P. M. which will put us at Dick's house about 10 P. M. We will stay there for the night and then go to Altonham early Sunday morning. We will then come home Sunday evening.

Today was mostly clear, warm and windy. Temperatures were low 38° high 82°. I stayed home all morning getting ready to go to St Louis & waiting for Dave to call me shortly after noon. He finally called me a little after 1 P.M. He had just talked to Dick Anderson. The bird is not there. Dick said that there were about 30 people out looking for it but no one could find it so they assumed that it has left. I really felt lousy over it but I have only myself to blame. at 2:45 P.M. Pearl & I took off & drove to Sugar Creek. We didn't have enough time there to find anything and the dust was terrible.

Today was clear & nice except for being terribly dusty, especially at Squaw Creek. The temperatures were low 45° high 73°. Ken Jackson picked me up at 7:30 A.M. and he & I headed north west. First we went thru the Amazonia flats, then to Honey Creek, from there by Monkey Mtn wildlife area, on up the River Road to Squaw Creek & back home. We were back home at 2:40 P.M. I stayed in the rest of the day

Today was cloudy + cool all day. The temperatures were low 45° high 55°. Pearl + I took a short drive before noon down around Lake. Contrary and then this afternoon we took a drive out to the Pony Express Lake Wildlife Area near Maysville. We were back home by 3:30 P.M. Today was our 44th Wedding Anniversary. I hope we both make at least 6 more years.

Today was mostly cloudy + rather cold. The temperatures were low 23° high 41°. It was really nice birding though because it was not windy. I picked up Ken Jackson at 7:30 AM + then we got back home at 5:30 P.M. after a good day of birding. We went first to Browning Lake at the St Joseph Airport then up + through the Amazonia flats, then up and by Honey Creek + by Monkey Mountain. From there over to the River Road + up thru Forest City. Out of Forest City to Big Lake and from there to Squaw Creek where we wound up the day.

Today was clear & nice. The temperatures were low 20° high 52°. I picked up Les Galloway at 8 A.M. & we went down to the Trimble Wildlife Area and Smithville Lake. Eventually when Smithville Lake is full it will inundate the area we know now as the Trimble Wildlife Area. Then it will be enlarged because so much of it will be under water and it will then go under the name of "Honker Cove". It is the home of the giant Canada Goose of Missouri. The Black Duck that we saw at Trimble today I really believe was a hybrid, probably with Mallard. It looked entirely like a Black Duck except it had a dark crown that sometimes showed some green. We got home at 1 P.M. We went mainly just to see how much water was in the Lake. They say it will be about 2 years before it is filled.

Today was clear + nice. The temperatures were low 21° high 55°. Pearl + I took a short drive out near the Wholesale this morning in the 102 River bottoms and then this afternoon we went to Squaw Creek to meet a group of St. Louis birders. There was about 15 of them. They were really a nice group of people, both men + women, mostly younger people. We stayed there until dark. I was trying to find a Ross' Goose for them but the geese were all too far away to recognize a Ross' Goose if we saw one. Pearl + I are going to meet them there tomorrow morning to try again.

Today was, clear, cold A.M. and windy all day long. The temperatures were low 29° high 55°. Pearl & I left home this morning at 6:30 A.M. for Squaw Creek. The St. Louis group met us there at 8 A.M. Finally at about 11 A.M. I found a Ross' Goose. Three of the group from St. Louis said that they saw it or another one but I am not sure if they did or not. Then this afternoon about 3:30 P.M. one of the women from St. Louis located one quite a way out in a flock of snow geese. Eventually everyone in the group were able to see it. About half of them said they would add it to their list only if I saw the bird and said that it was a Ross' Goose. I saw the goose and although it was quite a way out it definitely was a Ross'. Everyone then was real happy. After all they had driven about 350 Miles here and paid two nights motel bill to see that one species. So it is no wonder they were happy.

Today was ~~clear~~ cloudy & cool all day after a little rain during the early morning hours. The temperatures were low 36° high 44°. I had my best nights sleep last night in a long time. I went to bed at 8 P.M. & got up this morning at 7:30 A.M. I took my walk through the cemetery after breakfast and then around noon Pearl & I went to the airport and Lake County.

 39. Horned Lark 1 near Sm. L.

Today was mostly cloudy + real cool. The temperatures were low 16° high 37°. Larry & I left here this morning at 8:15 a.m. We headed for Smithville Lake. Larry had never seen it. We went in round about ways so it took us about 30 more miles of driving the way we went. It was clear when we left home but it was cloudy when we got there so it was pretty cold out in the open near the water. We ate our lunch there and we got home at 2:30 p.m.

Today was mostly cloudy + chilly all day. Temperatures were low 27° high 40°. We had no precipitation here but in St. Louis they had 8 inches of snow. This morning I took a walk thru Ashland Cemetery & drove a little out in the 102 River bottoms. Pearl, Lois & I went to Larry & Morettas home

this afternoon for our Thanksgiving Day Dinner. It was good. We came home at 4 P.M. where we stayed the balance of the day. In the gun season on deer hunting in this year in Missouri November 15th thru. Nov. 23rd there were 49,241 deer killed. This was a little ~~over~~ over 3000 less than their record year. This does not count deer taken by bow & arrow which began Oct 1st and doesn't end until Dec 31st.

Today was mostly clear & cool. The temperatures were low 21° high 48°. I birded today from 8:30 a.m. until 2 P.M. with Steve Crawford. He is a birder from Kansas City. He has been trying to arrange going birding with me for probably a couple of years. His folks live in Savannah, Ga. and his wife's folks live here in St. Joe. It seems like everytime he would call me it was always to go birding the next morning and I always had something else planned. He added a new life bird today. It was the Winter Wren.

Today was clear & cool. The temperatures were low 35° high 53°. This morning Pearl & I drove out to the air port & this afternoon we drove up thru Amazonia, Savannah & then back east of town & on home.

\* The estimated 3000 crows along the blvd. were a large bunch going to roost. The trees were black with them.
