

Squaw Creek Birds

A paper put out by the U.S. Fish and Wildlife Service shows a complete list of 265 species of birds as being recorded at the Squaw Creek National Wildlife Refuge from its beginning in 1936 up through May ~~1962~~ 1962. Many of the more rare species were added to the list during the last six years by members of the St. Joseph Audubon Society. Mainly Simon Rositzky, R. A. Brown and myself. I would like to predict that by the end of 1975 or roughly thirteen more years if we continue to cover the area as we have the last six, that we will run the total up to at least 300 species, or 35 more birds added to the present list. I have made a list of 57 species of birds that have been seen in recent years either in the state or near that might be placed on a probable or a hypothetical list. In addition to this list of 57 species there is always the chance rare or accidental species dropping in that I don't have on my list. Actually two of the birds on my list have been seen on the refuge but were omitted for some reason or other. The Dowitcher was omitted I believe because Mr. Kenneth Krumm who revised the list in May 1962 was undecided on which species we see there each spring in good numbers. I feel confident myself that it

is the Long-billed Dowitcher. Also I have the dates of two occasions when I saw a female Mourning Warbler. It was seen twice by me in the same area during the same season. In the two columns following name of species will be symbols. In the first column will show how I rate their chance of appearing on the Squaw Creek list. Pr will mean probable, Po will mean possible and r Po will indicate a rare possibility. The second column will show how they are rated at present on the Missouri State Checklist of birds made up by the late Rudolph Bennett of the department of Zoology at the University of Missouri. printed 1940

~~The following symbols are used~~
Symbols denoting their occurrence on the check list are identified at the end of my list of birds.

A few species that I feel confident occur frequently at Squaw Creek but are just overlooked are

Traill's Flycatcher, Hermit Thrush, Golden winged Warbler, Blue winged Warbler, Bay-breasted Warbler, Northern Waterthrush, Canada Warbler, American Redstart, Blue Grosbeak, Pine Siskin, Sharp-tailed Sparrow and Lapland Longspur
