The above is almost exactly like original with
few exceptions. Practically all of the Latin names
were scribbled in faintly in small writing with
pencil, as some of them I took from Patterson's
field guide. Mr. Wilson used very few
capital letters, periods, commas or any other
punctuation marks. On the next page I will
list the birds in AOV order to see how
the numbers run, and then I think I'll
list numbers of species either seen or taken
on certain dates. I couldn't help but notice
that May 4/95 seemed to be a good day
for him.
