To day was clear and hot. The temperatures were low about 32° high about 84°. This evening we all loaded up to go camping at Honey Creek. We arrived there at 6:30 PM. & it was dark by the time camp was made I am the only one who has to work tomorrow but Fred and Larry are the only ones staying tonight. Pearl and I

were coming home because I have to work tomorrow.  
 Maretta got sick and had a bad head ache & was  
 coming home with us so at the last minute Lois  
 decided to come home with us & go back early tomorrow.

We could hear just a few coyotes calling both Saturday night and Sunday night

Today was cloudy, chilly, windy and rainy. It rained during the night and was still raining this morning. It was wet, muddy & chilly so we ~~had~~ broke camp about 8 AM & headed for home. We all ate breakfast here at my house at 10:00 AM. I stayed home the rest of the day. The temperatures were low about 39° high about 59°

Bob Brown, Si Rositzky and another fellow were going to Squaw Creek this afternoon. Bob was driving this car. They were hit by another car at the entrance to Krug Park. I had been asked to go along, I was too tired to go. If I had gone that the accident probably wouldn't have happened because they would have come by here first.

Today was cloudy, damp, windy and chilly. The temperatures today were low about 38° high about 48°, I have a pretty bad cold today which made me feel miserable. I don't know if it is a result of our camping trip or not.

Today was cloudy, windy and cool all day. I didn't get up until 9 a.m. so by the time we ate breakfast it was 10 a.m. we Pearl & I started out. I didn't hear from Si or Bob so Pearl & I just birded around near St Joe till 4 P.M. Was most surprised of all to see the Pileated woodpecker about 3 miles north east of St Joseph near the Platte River in the same place that Pearl and I saw it two years ago. Temperatures were low 50° high 58°

Monday April 20, 1970.

Today was partly cloudy but real nice. This was the kind of day I would have liked to have birded all day. The temperatures were low 37° high 67°. The trees are just now beginning to show some green in the buds. If the weather stays warm then I am afraid that the trees will be pretty well leafed out for the big warbler migration.

Today was clear and nice. The temperatures were low about 37° high about 79°. I didn't have our truck this evening so I didn't get to take my evening ride after work. I am just hoping that this coming Sunday will be a nice day. If it is then I expect to get somewhere near 100 species.

Today was clear & hot. Rather windy this afternoon. Si Rostitzky and I birded together all day long from 7 AM until 8 PM. Harold Burgess was with us from 4 PM until 7 PM. We birded Krug Park, Timber along N.W. Blvd, Lake Contrary, Mud Lake, Horse Shoe Lake, east of town, Amazonia Road, Honey Creek, River Bluff road and Squaw Creek. I was really tired when I got home at 8 P.M. We walked quite a bit today. I think that this is only the second time I have gone over 100 species in one day during April. Even so we missed several species that we knew were in the area. The temperatures were low 55° high 84°. We saw two deer at Squaw Creek.

Today was mostly cloudy but nice. The temperatures today were low about 43° high about 57°. This evening after supper Pearl, Lois, Fred and I drove to Honey Creek where we took a nice long walk looking for mushrooms. We didn't find any at all but as can be seen I saw several birds. An hour or so earlier would have been better yet.

Today was a beautiful day. It was clear and warm with no wind. The temperatures were low about 46° high about 83°. Si Rositzky and I made the rounds from my home to Swamp Creek & back 7 AM until 8 PM. We missed many birds that we should have seen. John Hamilton had only about 100 species but had several that we missed.

27 Chipping Sparrow 2 KP-X  
 The day was clear and warm. It would have been a wonderful day for birding but because of Mother's Day business I didn't get to make my noon hour bird walk and also missed my after school drive. The temperatures today were low high

26. Downy woodpecker - X

Today was cloudy and rainy all day. The temperatures were low about 58° high about 63°. Because it was rainy, I was tired and had some of my bird records to catch up on I stayed in all afternoon.

Today started off beautiful. Si Rositzky & I left here at 7 A.M. under clear skies, cool and no wind. We went to Lake Contrary first and birded that area. It started clouding up about 9 A.M. From there we drove back to St. Joe and on out east of town till 10:30 A.M. we then came back to town & birded the NW. bird area for about half an hour. We met Hugh Sprague birding there and we all went over to Krag Park and birded till 12 Noon. It started raining lightly there as we left. We ate a sandwich & french fries at a roadside stop and headed for Honey Creek and Squaw Creek. We were just barely out of town when it started raining hard. We realized then that the road into Honey Creek would be too muddy so we bypassed it and headed toward Squaw Creek. After going about half way it became so stormy we turned around and came back home. During yesterday and today we had about 3 inches of rain. The temperatures were low about 52° high about 75°.

Today was cloudy + sultry all day. Temperatures were low about 74° High about 86°. It looked like it would rain all day but never did. This was one of those days you dream about. In my one hour at noon up in the hills I'll bet I heard + seen at least 100 Warblers, probably more. I would loved to have stayed there all day. I would have gone back this evening but I had heard that (from James Fairlie) were Bobolinks at Lake Contrary so I went there instead.
