Weather wise today was lousy.
(over)

It has been cloudy, foggy & drizzly all day. Pearl & I banded 8:30 a.m. till 12 noon. We first banded at Krug Park, then farmland near the St. Joseph Airport then back home via the Huntzger Road. I then banded 1 P.M. to 5 P.M. with Simon Kositzky. We banded at Krug Park and a swampy-wooded area near where the Mitchell Ave. Road crosses 102 River. Our best bird of the day was the Hermit Thrush seen by Si & I at KP. at only about 20 ft. Temperatures were about 26° to 36°.

It was very much surprised today when Pearl called me and told me that a Brown Thrasher was at our feeder. I hurried home and it was still there. The thrasher in addition to the Solitary Vireo on Dec 15th and the Hermit Thrush on Jan 1st. are all unusual dates for this area. All of these birds have been seen after sub zero weather. One possible reason for their occurrence here is a bumper crop of natural food for them. There is much fruit & seeds of Hacksberry, Poison Ivy, Buck brush, Bittersweet, Multiflora Rose and many other shrubs which I cannot name. There even seems to be an abundance of pine & spruce cones this year. There have been many Myrtle Warblers all feeding on poison ivy berries as do many of the woodpeckers.

Snow this A.M. & Cold. -3° this A.M. with a high of 2° for the day. I missed the Thrasher today, but Pearl saw it. Pearl also had another bird at our feeder that I would sure have loved to see. She described it as about the size as a house sparrow and a Golden Yellow in color. I can't imagine what it was. I figured that it was either a female northern finch of some sort or crossbill. Jim Joy called me this evening describing a bird that he had had at his feeder and I am sure that it was a rusty blackbird.

So far I have seen the Snow Bunting at our feeder every day this week. Although he is there only a few seconds or minute at a time he (~~he~~ or she) has always shown up somewhere from 11:45 a.m. to noon when I come home for lunch. The earliest that ~~he~~ I have seen it ~~was~~ was about 10 a.m. and the latest has been 4:05 p.m. Since our snow about ten days ago the feeders along the boulevard have been kept filled with feed so therefore make it a nice drive for birding.

34. White crowned Sparrow	25	- Sq. Cr.
35. White-throated Sparrow	2	'X - 'Sq. Cr.
36. Song Sparrow	3	Sq. Cr.

Even though I listed the bird seen recently here at home as a snow bunting I couldn't quite convince myself to full satisfaction that it was a Snow Bunting. It definitely was a finch and in size and shape it seemed to fit and from the text and pictures in two of my bird books it seemed to fit either the female or juvenile Snow Bunting more than any bird I could pick out. The two things that gave me and doubt at all was the lack of white wing patches and one time it lit in a tree. Today Jim Rising and Dave Easterla came up from Kansas City to see it and when Dave seen it he said that it was an English or House Sparrow that was completely off color. He said that he had seen lots of Sparrow collected because of their off colors all the way from albino to dark phase but he had never seen one this color before. My bird is light all underneath with a golden tone above.

I spent the afternoon at Squaw Creek birding with Bob Brown, Simon Rositzky and Harold Burgess. Today was clear and cold with a low of -9° and a high of 11° . Over the past ten days we have had only about 2 or 3 inches of snow but it has been so cold and with a drydown and wind it has drifted badly in some places.

This morning (Sunday 2-3-63) Beaul, Lois, Larry and I took out for a birds about 9:30 a.m. we drove east on Highway 36 to Highway 33, then south to highway 116, then west to highway 59, then north to highway of Mud Lake and Lake Contrary and on home. We got home about 1 P.M. and had driven 109 miles. About half an hour later I went out with Si Positely and Bob Brown. We took a walk in Krug Park and then drove out the Mitchell Avenue Road to an area near 102 river where we covered another area. It is always good for Sparrows in the fall, winter & spring and good for Warblers in the spring. Today was clear and cold but nice.

There is a wooded area of about 20 to 40 acres (my judgement on area size isn't too good) within five minutes drive of the Wholesale house that is fairly well isolated except when the mushroom hunters are out in the spring. This area is also very near my home. It has a small

creek along one side of it for water. The nest is wooded hill side with quite a few well developed old trees. I have decided that throughout the year whenever possible I will spend my noon lunch hour birding there. I can spend 45 to 50 minutes there and through the course of a year I might pick up some good birds, especially the warblers during migration.

Honey Creek Management Area is a tract of land owned and operated by the Missouri State Conservation Commission and open to the Public for hunting and fishing. It is rough hilly, partly wooded country lying between the town of Nodaway and 275 Highway on the east side of the Nodaway River. It is now 900 acres and by the end of this year 4200 acres more will be added to it. Any birds that I list either on or near the property I will identify the Area by H.C. Refuge.

Today was a pretty day. Clear but rather windy. Temperature about 50°. Pearl and I saw the female White-winged Scoter today on Browning Lake at the Airport within a couple hundred yards of where I saw the female Oldsquaw last Spring. Later, about 5 P.M. I went back with Jim Joy and we got to see it again.

Pearl and I bided 8:20 am till 12 noon at Lake Contrary, Mud Lake, Airport and then home at noon. We ate lunch and then Pearl and I drove Lois' Car to Squaw Creek. Today was the K.C. Burroughs Club trip to Squaw Creek. They were about ready to leave when Pearl and I got there so Pearl and I bided till 4:30 PM by ourselves. We got home at 5:30 PM. The day was clear till about 2 PM and then cloudy the rest of the day. Most roads were in good shape. High temperature 51°

45 This Morning at 1 A.M. George Stuppy, Bill Stains, Jake Hackett and Ed Holmer left St. Joe for Table Rock Lake in the Southwestern part of the State on a fishing trip, and of course for me a birding trip. We stopped in Kansas City and picked up Frank Stuppy and Ed Matney. We arrived at Antille Cove, our resort headquarters at about 8 A.M.

Beale & I birded 8 a.m. till 11 a.m. at LC, and M.L., Larry & I then spent about 45 minutes in K.P. Bob Brown, Simon Rositzky and their wives picked me up at 1 P.M. and we headed for Squaw Creek where we stayed until near 7 P.M. It was cloudy all day with a little rain. Today was Simon's 58th Birthday. I was very much surprised today to see the Loons, Snowy Plover and Long-billed Curlew. Burgess got to see the Plover but not the Curlew.

Simon Kostyky and I left home at 79 M and		

drove down to and around Lake Contrary and then
drove to a thicket near the 102 River on the
Mitchell Ave. Road. He had a business meeting
at 10 A.M. so he brought me home then, I
then birded a short time at Krug Lake by
myself. Rositzky then picked me up at 10 P.M.
and we drove to Squaw Creek. A wealthy
farmer friend of Bob Browne by the name
of Walter Bales (W.B.) owns about a
thousand or more acres in the river bottoms
near Toober, Mo and he has dammed up a
creek and is making himself a nice sized
lake of his own. During nice weather we
will probably make it a regular stop.
We got back home at 7:30 P.M. We have
had just a matter of a very few inches of
rain since last fall and as a result
everything is very dry. Two of our favorite
birding places at Squaw Creek has dried
up completely. Because of that we will
have a shortage of shore birds unless we
get some good rains soon. Larry has
been home sick since last Wednesday
so Saturday we took him to the doctor. After
examining him the doctor had us take
him to the hospital. They have run a
lot of tests on him but so far they are
not sure what the trouble is. He is
running a high fever and is sick at his
stomach all the time. He is also
dehydrating so they are feeding him
through his veins. Pearl spent the
whole day today at the hospital. I
went down at noon and again this evening.

Sunday. April 14/1963.

This was a beautiful day weatherwise. Clear and dry, no wind and the temperature in the lower 40's 9 AM and near 70° in the afternoon. Simon Rositzky & R. A. Brown picked me up at 7 AM & we drove down to and around Lake Country till about 8:30 AM. We then drove to our favorite birding spot out on the Mitchell Avenue Road near 102 River. We found quite a few sparrows but our favorite field had been burned off. We then came home at 10:30 AM. I birded by myself then for about an hour at Koug Park by myself. They then picked me up at 1 P.M. & we went to Squaw Creek and stopped at the Walter Bales farm on the way. We only spent about 2 hours at the Refuge and saw no shore birds. We got home at 6 P.M. The best bird of the day was the Bonaparte's Gulls.

Pearl + I left home at 7:15 a.m. Drove through Krug Park and then down and around Lake Contrary and Mud Lake. We then drove out to our favorite birding spot on Mitchell Avenue Road near the 102 River. We then came home + ate dinner and then Pearl and I went to Squaw Creek. We came home at 6:30 P.M.

Larry had a week yet to stay in bed so Lois stayed home to wait on him. Today was clear + nice except a bit windy. Temp low about 45° high about 68°. I don't think we have had over about 3 inches of moisture since Jan 1st. which is nearly 4 months and every thing is very dry.

I worked till noon but saw quite a few of the birds at home this a.m. and on way to work. This afternoon Pearl, Larry + I went to Mud Lake via L.C. to do some fishing. I wore tennis shoes and did some wading in a marshy area. That was how I flushed the Soras, Bittern, Woodcock and Green Heron.

This morning Simon Reitzly, Bob Brown and I started birding at 6 AM and wound up this evening at 8 PM. We birded at Kougash, Lake Controvy, Mud Lake, Michell Avenue Road and Squaw Creek. Harold Burgess made the rounds with us at Squaw Creek. It was mostly cloudy all day but no rain. It was a bit wet and muddy underfoot. Bob & I saw three birds that I missed. They were Bob White, Nighthawk & Snipe. Hootie Hamilton, another fellow from St. Joe is getting to be rather active at birding. He had only about 70 species on his list but he had two or three that we didn't have. In addition to that there is at least a dozen others that we missed that we should have seen.
