

Dave, who was the first one to find the bird seems to think that it might be a displaced Asiatic species of Pepsits. I think that we wound up the two day week end with a total of 168 species. This covered Squaw Creek, the St Joe area and Maryville area. I believe that Dave Easterla was the one biggest contributor.

Today was clear + nice but cool. Temperatures were low about 39° high about 64°. At 4:30 PM.

John Hamilton + I went back to Squaw Gulch to try + find our odd ball pipit to take a picture of it. We stayed until near dark but failed to find the bird. I am really tired now need a lot of rest. I have waded more mud + water and weeds the last 3 days than ever in my life.

Today was clear & nice, even if real chilly this morning. We had a light frost this morning with a record low of 33° and our high was 69°. I heard today that Dave Easterla relocated our unidentified bird (Pipit?) in a similar area north west of Squaw Creek and collected it. If so we should know in a few weeks its identity.

Today was clear & warm. The temperatures today were low about 48° high about 80°. I have noticed the last few days around home that the sparrows, starlings, Robins, catbirds, ^{Thrashers} wrens, Bell's Vireos, Grackles are all feeding ~~off~~ young birds, many of them just off the nest. Two weeks ago I located a Ruby ^{throated} Hummingbird's nest in Krug Park.

This was a beautiful day for summer birding. It was mostly cloudy + cool all day. The temperatures were low about 59° high about 76°. I birded 9 a.m. until 11:15 a.m. down Hunter Road, Lake Contrary and area east of town with Pearl. At 1:20 p.m. I left with Si + Monga Rositzky + birded A.R., Honey Creek, river road and Squaw Creek. A college student, John Hoskins from California who is working the summer at Squaw Creek birded with us at Squaw Creek. We helped him add several new life birds. We got home at 10:40 p.m. ate supper at Forest City.
