Today was nice starting out but soon clouded up. During the afternoon we had light rain at times. The temperatures were low about 35° high about 43°. I don't plan on pushing myself this year on my birding. I don't care if I get only 100 species for the year. I want to concentrate on new birds for the state or lifers any where I can find them.

Today was mostly cloudy and warm for this date. The temperatures were low about 40° high about 56°. I worked until noon, took a short ride east of town and drove to Honey Creek Wildlife Area where I took a nice long walk while Pearl sat in the truck with her sewing. I walked about two miles. It was pleasant except for the last half mile where it was rather muddy.

Sunday, January 9, 1972

16	Slate colored Junco	150	NE

NE = route north east of St. Joseph 300 miles round trip. My farthest point was Unionville, Missouri. Skies were clear, a pretty good wind, and very cold temperatures all day. Pearl went with me. During the entire trip we flushed probably a couple thousand or so small birds from along the roadside. I know that several were Horned Larks and Juncos. Probably most of the others were sparrows with Trees predominating. The temperatures today were low about -5° high about 15°.

Saturday January 15, 1972

1	Rock Dove		X
2	Mourning Dove	5	X

Today was mostly cloudy and very windy + cold. The temperatures low about 12° high about 36°. I spent my noon hour today shopping for a stereo record player, which I bought and then I spent all evening hooking it up. It does almost everything except cook meals and clean house. Besides playing records it has AM-FM Radio and a tape recorder. I can use the same tapes that I use on my tape recorder and can tape a radio program or record automatically while listening to it.

Today was clear and cold all day. I spent most all day in the St. Louis, Mo. area. a = Alton Dam and Lake area. m = Mississippi River for several miles down river from Alton Dam mostly on the Missouri side. I got up this morning at 3 a.m. I ate breakfast and then Mark Robbins came by at 4 a.m. and he and I headed at that time for St. Louis, Mo. to try for some of their rare gulls. During the winter months they quite often come up with Glaucous Gull, Iceland Gull and Black Legged Kittiwake. On fewer occasions they have seen the Great Black backed Gull and Sabine's Gull. We left St. Joe at 4 a.m. and drove directly to the Alton Dam and Lake on the Missouri side just across the river from Alton, Ill. We drove exactly 30.7 miles and arrived there at 9 a.m. which means we were on the way exactly 5 hours. We stopped 3 times, once for about two minutes at a rest area and twice for gas. Mark + I bided by ourselves until noon at the Alton Dam. The water above the dam which they call Alton Lake was all frozen over except for a few pot holes. After we ate lunch we drove to Dick Anderson's house where he then proceeded to show us some places along the Mississippi River for birding. It was from a riverside park off of Riverside Drive that we found the Glaucous Gull. As could be expected, Dick found it first. It was almost a pure white bird. Finally about 6 P.M. Mark and I checked into a Ramada Inn Motel a mile east of the junction of highway 67 and Interstate 270. We ate our supper there and then just stayed in to rest. The Glaucous Gull is the one most commonly seen in the St. Louis Area so Mark and I were most happy to see the ~~Glaucous~~ Glaucous Gull if we were allowed only one new bird.

Today was clear and warm, though a bit windy. The temperatures were low about 28° high about 58°. At 8:50 AM Pearl, Lois and I left home and headed northwest for the Brickyard Hill Wildlife Area near Rock Port, Mo. We drove up the River Road to Forest City, Mo, then by Big Lake and from there through the River bottoms to Brickyard Hill. It was about 85 miles. On our way back we came through the Squaw Creek Refuge where we stayed about three hours. We took a nice long walk around the lake at Brickyard Hill Wildlife Area.
