| 39. Song Sparrow | 5 | KP - near Amazonia - AP |

I Birded 8 AM till 11 AM with John/Hamilton at K.P.
 I took a drive through the Amazonia flats 11: 9 AM till
 12:15 P.M. (Pearl & Lois had gone to Pleasant Hill). Larry
 and I then went to the Airport arriving there about 1 PM.
 Larry & I saw the Snowy Owl at 1:07 PM. At 2:30 PM.
 Dave Easterla arrived and although the Snowy
 Owl had moved Dave and I located it right away.
 It was near 3:15 PM when John and Julie
 Hamilton arrived and they also got to see the owl.
 Larry & I came home about 4 PM and I then took
 Larry up along the NW. Blvd. to set a couple
 of OBH traps. Pearl & Lois got home
 while we were off setting the traps and thinking
 we were at the airport they drove over there
 and luckily at 5:10 PM just barely before
 dark they were able to see the Snowy Owl.
 Every time we have seen it the bird has
 been on the ridge of various buildings
 where a lot of activity goes on. It is also
 right next to the subway where the planes
 go out and in. Today was clear, windy &
 Chilly all day Low about 30 high about 50°.

Today was mostly clear. low about 30° high about 50°. John Hamilton and I started birding 8:15 a.m. at K.P. There until 11 a.m. I then drove through the hills north of town to Amazonia then back through the Amazonia river bottoms. Pearl & I then birded 1:30 p.m. until 6 p.m. at Lake Contrary and Airport. Was very happy to see the Snowy Owl again but was amazed to see the Rough winged Swallow. I watched it flying all around me and over the water for about 5 minutes.

This AM it was 44° & Clear but now 4:45 PM. Cloudy, Windy and getting colder. It rained just a little bit this afternoon. This Morning about 11:30 A.M. Alvin Anderson from St. Louis, Wally George and Kay Stewart from the University of Missouri came to St. Joe to try & see the Snowy Owl. We covered the airport pretty well but did not find the owl. We couldn't find any one who has seen it since last Sunday. On their way out of town I took them through a town of Ashland Cemetery where we were fortunate enough to see the 31 Red Crossbills. They were new life birds for Kay so their trip wasn't in vain.

This afternoon I had to go to the bus station so I made a quick trip and then drove on over to the St. Joseph Airport just on the chance of seeing the snowy owl. I looked all around its usual haunts but didn't see it and then just as I crossed the small bridge out of the Airport ~~property~~ property into Kansas I saw the Snowy Owl sitting on a telephone pole. I knew that Ron Reynolds, one of our Museum photographers had never seen a Snowy owl and that he wanted to see it so I hurried to the Museum and took him back to look for the owl. It had moved but we found it sitting on another pole about a quarter of a mile away. I get as much enjoyment showing a new bird to some one as I do seeing it myself.

Wednesday, December 11, 1963

Today we had a 2" snow with a low of 10° and a high of 22°.

12. The Bluebirds (4) sure looked pretty feeding on bittersweet with the snow falling thick and fast

Thursday, December 12, 1963

We had a glow of -4° this AM and clear. Our high for the day was 23° . I had a small article run in last night's paper about the Snowy owl and because of it I have had three calls from people concerning birds. One of them was from a Mrs. E. L. Hayes who thought that she had evening grosbeaks at her feeder. I checked on them at noon today and sure enough they were evening Grosbeaks.

Clear + cold all day. Low about zero high about 12°
 John Hamilton & I left here at 1 P.M. + drove through
 the hills here to Amazonia, then through the Amazonia
 flats and back through a small valley a few miles
 northwest of town + back to town. I will hereafter
 call it A.R. to substitute for Amazonia Road. We
 then went to Ashland Cemetery which I will
 hereafter list as A.C. We then drove on
 down to South Noyes blvd. to see the Evening Grosbeaks
 but they were not there. We then drove to the airport.
 We got back home about 5.30 P.M.

The Lincoln sparrow I caught in the boiler room at Gray Area. It had gotten enough oil on it by hopping around on the floor to make it unable to fly. I caught the bird and brought it home. Its tail feathers came out and they were very oily. Today was cloudy and snowy all day. Low 12° high 20° .

Wednesday December 18, 1963

Clear and Cold. Low -7° high 11° .

25. White-crowned Sparrow 3 A.R.
26. Lapland Longspur 12 A.R.

I worked until noon today and just because of rumors of a white winged crow near highway 36 about 10 miles west of St. Joe in Kansas I took a ride there. I suspect that the bird is a Magpie. I was lucky enough to see the Snooty owl however. I also found a least shrew where a Shrike evidently had placed it. Pearl and I also saw a goldfinch with a white frontal shield on its head where it shows black in the summer.

Mostly cloudy. low 19° high about 30°. This evening Pearl & I went with Mrs. Porelson to see a Mrs. Williams who lives in east St. Joe. She has three birds in her home flying free that she has had since they were found while young and unable to fly. One is a Rock Dove, one a

Mourning Dove and the other one is a ♀ Rose-breasted Grosbeak. The Grosbeak is a regular clown and seems to delight in tormenting the Mourning Dove.
