KP

Disappointed today at seeing no more birds than I did.

I did hear a Downy Woodpecker and Carolina Wren.

Today was clear & nice. Temperature about 40°. Dry underfoot. My robin today was my first listing of one for December. A year ago today I listed 19 species, 7 of which I did not see today.

Sunday, December 5, 1954.

1. Cooper's Hawk

2. Rock Dove

Went with my brother Walter Lee and another young fellow named LeRoy (Red) Kelly. 9 a.m. to 11 a.m. I was surprised to see three different kinds of shore birds. There were quite a few Killdeer, 5 Wilson's Snipe and 2 Semipalmated Sandpipers. It was cloudy, windy and cold. The temperature was about 25° to 30°. Small pools of water were mostly frozen over.

Today was clear and bright with the temperature about 10°. A glaze of ice was on everything because yesterday we had a freezing rain. That probably explains why I only saw 3 species on my Northwest blvd. trip which covers about two or more miles through a heavily wooded section of hills. I stick pretty much to some paths that originally was made by horses for a Bridle Path.

About 8:10 a.m. my brother Lee, his wife Mary Ann, Pearl, Larry and I took off in Lee's car. We drove to Lake Contrary, Mud Lake, Sugar Lake, Bean Lake then back to Krug Park where we ate our picnic lunch. Then up the Missouri River Bluff road through Amazonia, Nodaway and Forbes and then back home at 3:30 p.m. Not many ducks or geese. I believe that they have mostly gone on north. On almost every pond we saw shovellers and coots. Other birds seen most everywhere we went were Red-tailed Hawk, Shrike and Black birds. The one bird that surprised me was the Bald Eagle seen near Mud Lake.

Sunday. March 20, 1955.

Sun. 4/3/55

Made my trip today with Bill Lansaw. He is a 14 year old boy scout who is trying for his Merit Badge in bird Study. He must be able to identify 40 species of birds on sight. It was a pretty day but very windy. We were gone from 9 A.M. to 12 Noon. I saw my first Snake of the season today. It was a water Snake. This afternoon with the family we drove out to Grey Acres and then later on Larry and I took a walk up on the hill about two blocks from our house where there is a cave quarried out of a rock wall. Phoebe's usually nest there in season.

Sunday, April 10, 1955.

I met at Krug Park and talked for awhile with Mr. Lawrence Buzard who lives at 18th. & Howard St. He is a friend of Dean Cole. I made the trip by myself and cut the trip a little bit short. I had planned on going out to Cerey Acres this afternoon and running my list up to about 40 or so, but I didn't make it. This was a beautiful day. Clear & warm. Temperature about 65°.

Field trip covered back country roads in the Platte River bottoms near Rochester, Mo. Went with Simon Rositzky, Roy E. Coy, Don Reynolds. Roy and Don went to take pictures while Si and I went to look for birds. I could probably have seen more birds at Krug Park but the change was good for me and I was most happy to add the Lark Sparrow to my all time list. It was a beautiful morning with the temperature about 60°. We left at 7:30 a.m. and got back home at 11:30 a.m. Saw lots of wild flowers and found a few red mushrooms. We found grass pinks, Jack in the Pulpit, Dutchmans Breeches, Blue and yellow violets, May Apples and Deaths Cup.

35. Goldfinch	X
36. Field Sparrow (heard)	X

I didn't take any regular bird trip today. I had to work from 8 A.M. to 10:00 A.M. Pearl and I then walked up to Krug Park but there were so many people there we stayed only a little while and then came back home. We did get to take a nice ride with Bert and Viola this afternoon along country roads east of here in the 102 River bottoms. The Horned Lark and Shrike were the two I was most happy to see. Today was clear and bright but cool. ~~The~~ Thermometer reading on our front Porch this morning was 38°.

Tuesday, May 10, 1955.

Birds seen at
home + K.P.

1. Rock Dove
2. Mourning Dove
3. Chimney Swift
4. Yellow-shafted Flicker

Started my vacation at noon Saturday, August 13, 1955
 so I am keeping a record each day while on vacation.
 While staying home I don't see many so I am entering
 only those days that I see several. The amounts
 each day through today were 11, 19, 14, 13, 11, 23 + 38.
 Today Pearl, Lois, Connie, Bert and I went
 fishing in Browning Lake at the Airport.

Sunday, August 21, 1955.

Bert and I went fishing this A.M. we left home at 6 A.M. and got back at 1 P.M. We fished in a pond, or hole that the Missouri River had washed out a few years back during a flood. When the River went back into its banks it left this hole which is pretty deep. Some places it seems to be about 20 to 30 feet deep. It is about 2 to 3 miles west of Forbes, Mo. We caught 16 fish averaging about $\frac{1}{2}$ lb. each. Mostly Carp.

Went with Kenneth Hawman 6:45 A.M. to 10:00 A.M.
Mostly Cloudy and Cool

Sunday - Saturday, October 8th & 9th, 1955.

I spent these two days at Clover Point Camp, Lake of the Ozarks State Park where the Missouri State Audubon Society held its annual meeting. There were about 150 people present. Pearl and I went with Mr. & Mrs. Robert O. Powelson and a Mr. Fred Wilkins. Mrs. Powelson is Northwest Missouri Regional Director for the State Society. My list totaled 43 species. Five of them were brand new for me.

A = on the way down Saturday morning

B = Saturday P.M. Field Trip

C = Sunday A.M. Field Trip

D = Sunday afternoon on the road back Home

Left home at 8 a.m. with Kenneth Hawman and went to Airport. It was nice when we left home but at about 9:30 a.m. it clouded up and got real windy and started getting cold. We came home at about 10:30 a.m. It continued to get colder all afternoon and the forecast now is to go down to 25 or 30° tonight. Today we dug our Canna Bulbs

and hauled our potatoes and onions to the basement at Pearls folks. I had an invitation to attend the Kansas State Ornithological meet today at Lawrence but was unable to make it. The A.D. Coles asked me to come down to their home and stay last night and go with them this A.M. I sure wish I could have gone

Kenneth Hawman, Walter Skinner and I took our regular November trip along the railroad right of way parallel to the Platte River from Highway 36 north. It was clear, windy, and cold. The temperatures were about 28° to 40°. The past two years I saw 29 species. Today I saw 32 along the right of way. Was most happy to see the Heron, Mourning Dove, Owl, Red-breasted Nuthatch & Brewer's Blackbird.

I spent the morning 8 a.m. to 11 a.m. at Krug Park with Kenneth Hawman. It was partly cloudy and nice. About 33° to 40° and dry under foot. My biggest surprise was seeing the Great Blue Heron at Krug Park. My family and I went over to Ralphs and Alices for dinner and stayed until about 5 P.M. We picked up 16 bushels of walnuts and brought 10 bushel of them home. This afternoon was cloudy and the wind came up and was real chilly. Best two birds were Red-headed Woodpecker and Great Horned Owl.

Clear and nice. Temperature about 35° at start and 65° at noon. Time 8 A.M. to 12:30 P.M.

Sugar Lake and river road north from Atchison, Kans. on Kansas side of river, for about 2 miles. Timber on one side and Levee and creek on the other, was very much surprised to see Sugar Lake practically all frozen over. That and hunters in blinds all over the Lake cut down our chances of seeing many ducks. The trip was a combination of the

Burroughs Club of Kansas City and the St. Joseph Audubon Society of St. Joseph. There were about 50 total persons. Pearl, Walter Skinner and I went together in Walt's car. Mr. & Mrs. A. Dean Cole were the leaders of the group. I was sure glad that Pearl went. We had a wonderful time.

Tuesday, November 22, 1955.

Today was disappointing as far as birds are concerned. First off I sent my new glasses back to "Bushnell's" to have them re-adjusted. I have felt like what I imagine a Blind man would feel like without his seeing eye dog. Besides that I was continually running into someone in the Park and I like to be alone. My new glasses are a pair of 10X50 binoculars by Bushnell that I bought after I came back from the State meeting in October. While there I used a pair of the same kind that Mrs. A. Dean Cole loaned me. They were so much better than the 8X40 Rogge glasses that I was using I made up my mind then that I must have a pair. The difference between the two pair should make the difference between positive identification and indecision.

Sunday, December 11, 1955.

I still didn't have my glasses today so I didn't go on a bird walk. I feel completely lost without them. The weather is still cold with just about all the ponds and lakes frozen over. Even the Missouri River is pretty well frozen over in most places. The November just ending was the coldest on record for the St. Joseph Weather Bureau and it is continuing on into the month of December. This afternoon Bert and Viola took Pearl, Larry and I for a little ride over to Troy, Kansas, then back to St. Joseph and on down around Lake Contrary. I saw several Hawks I couldn't identify besides several smaller birds. All I was sure of was:

1. Sparrow Hawk several in Kansas
2. Mourning Dove (4) along Hiway 36 in Kansas
3. Bronzed Grackle one flock in Kansas
4. Marsh Hawk near Lake Contrary
5. Ducks 2 flocks in Kansas

I was happiest to see the Mourning Doves

Tuesday, December 13, 1955.

I got my glasses back yesterday so today was my first day with them. They work wonderfully well.

0 represents a
wooded area on an
abandoned farm about
7 miles N.E. of St Joe
just off Highway 169.

Tues. 2/7/56.

Kenneth Hawman and I covered a wooded area on a farm about 7 miles northeast of town just off of Highway 169. It was warm, about 45° but it was snowy and muddy under foot which made for bad walking. Ken killed one rabbit.

Sunday, February 12, 1956.

Kenneth Hawman and I left home at 8:30 a.m. and got back at 12:40 p.m. First we went to Squaw Creek where we saw most of our birds and spent most of our time. Saw probably about 100 Canada Geese but probably 100,000 Mallards. I even hesitate to estimate. Saw about half a dozen Pintails and about a dozen American Mergansers. Hawks were everywhere with Bald Eagles predominating. We saw 11 in the air at one time. We saw only one Golden Eagle and Roughleg. We saw what we figured to be a Swainson's Hawk but after checking on its migration and as to where it winters we assumed that we were misguided by its markings.

Pearl, Larry and I went to the Trimble Wildlife Area where we met the Burrough's Nature Club of Kansas City and went on a field trip with them. It was chilly at start but unseasonably warm and windy before the day was over. Ben King rode back to St. Joseph with us and then we went up to Krug Park. From there I took him back to St. Benedicts college at Atchison Kansas where he is going to school. We stopped by ~~Atchison~~ Lake Contrary and Mud Lake on our way down. Pearl went with us. It was 6 P.M. when we got back home. As we started out this morning at 7:15 a.m. we had a full day. ~~The~~ added two new birds to my life list. They were Black Duck at both Trimble and Mud Lake and the Red Crossbill at Atchison, Ks. There were about 25 members of the Burroughs Club at Trimble. Pearl and Larry were both worn out but I had a wonderful time. Deon & Elizabeth Cole were also on the trip.

Kenneth Hawman, Walter Skinner and I left the wholesale at Noon and drove to Lake Contrary where there were very few birds, then on to Mud Lake which was covered with Ducks and from there to Horseshoe Lake which was black with Ducks. I was very happy to see the Mockingbird resting on a telephone wire near Horseshoe Lake. Then on to Browning Lake which surrounds the St Joseph Airport on 3 sides. Got home at 3:05 PM.

Mostly clear and cold. The temperatures were about 12° to 35°. By myself at Krug Park and Airport until 10:30 a.m. Then Ben King and I went to Squaw Creek for the afternoon. We got back home at 5 P.M. I then took Ben to Atchison Kansas. We were supposed to be picked up by members of the Burroughs Club earlier in the morning but somehow we got fouled up and they missed us. Three new ones for me were the Lesser Canada Goose, Ruddy Duck and Herring Gull.

Tuesday, March 13, 1956.

Krug Park by myself 7 a.m. to 10 A.M. Mostly clear clear and nice. Temperature about 30° to 40°. Took a short drive in truck to Airport and was glad to see Krider's Hawk at very close range. In fact less than 50 feet for quite a while as it flew up from in front of the car and a strong north wind held it almost stationary.

Kenneth Hawman and I went to Sugar Lake. While Ken fished for about an hour I looked around. Birds were fairly scarce at Sugar Lake but maybe it was due to strong winds. In quantity there were many more birds at Mud Lake. There were practically no water birds at Lake Contrary. They put out the domestic Mallards on the Krug Park Lagoon today so maybe that will attract some wild ducks. It usually does. I was very much surprised last evening to see a Purple Martin flying near my Martin House. I saw it clearly so there was no doubt.

Squaw Creek

Left home at 8:20 a.m. with Simon Rositzky, Ben King, Lee Burgess, Stephanie Rositzky and Susie Rositzky. We went to Squaw Creek where we stayed until about 1:30 P.M. Although all the above birds were seen at Squaw Creek we were pretty much disappointed. We expected to see more shore birds. It was very windy but warm. With 6 of us in the car it was a bit difficult at times to see. We met Wes Newcombe while we were there. He is a federal agent of the "U.S. Fish and Wildlife Service". Ben found two dead geese and a Pintail Duck that were in good shape so he brought them back with him.

Wes Newcombe wasn't going to let him take them out until he found out that they were going to be used at a college and that they have a collectors permit.
