Today was clear & nice. Really the sun itself was hot but it was cool and pleasant in the shade. I left home at 7 A.M. with Kenneth Jackson. From here we drove up through Amazonia to Honey Creek where we birded just a little. From there we drove over to the Monkey Mountain Wildlife Area where we took about a three mile walk while birding. We left there about 10 A.M. & drove up (R.R.) the River Road to Forest City and from there on to Squaw Creek. We made the rounds there and took a one & a half mile walk there. We got back home at 2 P.M. where I stayed the rest of the day. The Red breasted Nuthatch here at home today was my earliest date by two days. While Ken & I were walking in the timber in the Monkey Mountain Wildlife Area we flushed four of the Ruffed Grouse that we had released about a month ago. The temperatures today were low 65° high 82°.

Today was mostly clear & cool all day. The temperatures were low 56° high 74°. This morning I left home at about 7 a.m. with Larry & Chad. We went to Honey Creek where we took a nice long walk, then up the River Road thru Jorbes and Forest City to Squaw Creek. We made the rounds there and then came home, arriving home about 4 P.M.

Today was cloudy, cool & wet all day. It rained lightly off & on all day. Temperatures were low 57° high 68°. I bought a new pair of binoculars today from J.C. Penney, Co. They are a cheap pair and I don't really care much for them. They are 7x35. Maybe when I get used to them I will like them better.

Today was a beautiful day. It was clear, real cool & nice. The temperatures were a record low 38° high. Pearl & I took a 40 mile drive this morning down around Lake Contrary, by Muskrat Lake, Horseshoe Lake & thru Bluff Woods. We got home at 12 Noon. Pearl & I then mowed our entire acre of grass. Early this morning we had a pretty heavy fog due to the cold air in contact with the warm earth. Temperatures today were low 38° high 68°.

 Today was clear & nice. Pretty chilly this morning but pretty warm this afternoon. The temperatures were low 45° high 82°. My birding today was limited to a short drive out east of town in the 102 River Bottoms and what I saw here at home. This evening Pearl, Larry, Chad and I went to Central High School to see our first Audubon picture of the year. It was the Texas picture that I helped make 10 years ago.

Today was clear + hot. The temperatures were low 64° high 89°. I stayed home all day. This evening after dark Ken Jackson came by + said he was going to Bluff Woods to listen for Whip poor wills. I didn't think we would hear any but I went along + took my tape recorder. I did get two Screech Owls to answer my taped calls.

↑ Today was clear, hot and windy. The temperatures were low 74° high 95°. Winds today were 10 to 40 MPH.
 at 7:30 a.m. I went with Larry & Chad to the "Worthwine Island Wildlife Area". It is an area bordering the Missouri River west and a little ~~but~~ bit south of

Amazonia. Larry + Chad went to fish and I went to Bird Watch. It is the same place where I found the assortment of ducks on our Christmas Bird Count last year. We came home at 12 Noon where I stayed the best of the day. This area is also where I found the two Turkeys last year on our Christmas Bird Count.

Today was cloudy, damp & chilly all day with some light rain during the afternoon. Temperatures were low 41° high 63°. Peggy & I took a drive this morning down around Lake Contrary & by Muskrat Lake and Horseshoe Lake. I was very much surprised to see the Joeyeg. It was sitting on the water but in the center of Lake Contrary. I got to a phone right away & called Leo. He was there in about half an hour. I observed the bird for about two hours. I saw it at rest on the water, feeding on the far bank and in flight. It was after noon when we finally got home. I called the bird club in Kansas City to notify them of the bird and I called Kenneth Jackson's home & told his wife to have Ken call me when he came home from work. He called me at 5:50 P.M. & I told him about the bird. He came by for me in just 10 minutes. Luckily the bird was still there. We never did get a good look at the bird though because it was on the far side of the lake. A lot more birds had moved in since we were there this morning. It was cold, damp north wind coming in.

Today was clear, cool & nice all day long. Temperatures were low 46° high 68°. I took a walk this a.m. up along the timber along the boulevard, then Pearl & I went over to the St Joseph Airport this afternoon to see what was on Browning Lake. This evening about 6:50 Ken Jackson came by. He had been to Lake Contrary & saw the Jaeger at close range & he came by to take me back down

there: The sun had gone down when we got there, but we did see the Jaeger on the bank only about 35 to 40 feet distance eating a fish. With just our binoculars we could see every detail very clearly. We stayed there till dark & I really felt bad because birds started coming in from all directions & all we could get was silhouettes. We saw one bunch of 100 to 150 birds fly past. They did not make a sound but they were either Gulls or Caspian Terns. There must have been 200 shore birds along a short stretch of sandy beach.

Today was clear, cool & typical nice. The temperatures were low 35° high 71°. Last night I went to bed about 9:30 P.M. but couldn't go to sleep thinking about the Jaeger and all the other birds that came in just at dark. The longer I lay there the more wide awake I got. Then I realized I hadn't called Dave and that bothered me. The more I thought of Dave the more positive I would be that it was a parasitic if Dave agreed. Finally I told Pearl that I was going to get up & call Dave so I could go back to bed and go to sleep. When I finally got through to his home he wasn't home so I left the message with Dave, Jr.

This morning at 7 A.M. Dave called & said that he would meet me at the Lake. I was the first one to get there and the bird was sitting right out in the wild open eating on a dead fish. It was still there when Dave came in. Right away Dave said it was a Parasitic Jaeger. Dave got several pictures of it with a telephoto lens at about 50 to 75 feet. He was very happy that I had called him on the bird. I was also.

Today was cloudy most all day. Warm, cool all morning.

Partly clear & warmer this afternoon. The temperatures were low 55° high 75°. Kenneth Jackson came by home & picked me up at 7 A.M. We drove from here to Lake Contrary first. We met Si Rositzky there. Si got to see the Parasitic Jaeger at very close range this morning and then I and Lawhorn got to see it at close range & photograph it this afternoon. After birding at Lake Contrary Ken & I made the rounds of Mud Lake, Muskrat Lake, Horseshoe Lake, back thru St Joe on the boulevard & on up to Honey Creek, from there up the River Road thru Forbes & Forest City, on to Squaw Creek, from there over to Big Lake & back thru Squaw Creek & back down the River Road to home at a little after 7 P.M.

 Today was a beautiful day. It was mostly clear and cool A.M., mild the balance of the day. Temperatures were low 40° high 74°. I birded with Si Rosity by 7a.m. until 10:30 a.m. I stayed home the rest of the day.

Tim Barksdale called me this evening from Kansas City. He is hitch hiking from Lake of the Ozarks to St Joe to try & see the Jaeger. He wanted to know if he called me from a restaurant out just off of Interstate Hy 29 would I come out & pick him up & then take him to Lake Contrary tomorrow morn. I told him I would. It was 30 minutes past mid-nite when he finally got to our house. The fellow who picked him up on the highway brought him all the way to my house. We all turned in about 1:00 AM.

To day was cloudy, damp + ~~well~~ all day but no rain. We got up here at home at 6 a.m. Tim + I left home at 7:20 a.m. + headed for Lake Contrary. We made the rounds there + was almost ready to leave when we finally found the Jaeger. Tim was one very happy young man. I made the tour + showed him the ways to get to Lake Contrary, Mud Lake, Muskrat Lake, Horseshoe Lake, Bluff Woods and Browning Lake at the St. Joseph Airport. We got back home at 12:30 P.M. We ate lunch and then I took him out on to hiway 71 where he was going to hitch hike to Maryville, Mo. I would have liked to have taken him to Maryville but my car I am afraid to take very far from St. Joe. I then stayed home the rest of the day. Temperatures today were low 5-9° high 70°

Today was clear and warm. The temperatures were low 58° high 88°, A Mr + Mrs Larry Kennard came by this morning about 9:20 a.m. Mr. Kennard is

a Methodist Minister from Gallatin, Mo. He and his wife are new birdwatchers. His folks live here in St. Joe. I went with them this morning to the lakes south west of town & thru Bluff Woods just to show them how to find the areas. I was back home by about 1 P.M. My only disappointment today was my failure to find the Jaeger. I am afraid that it has left.

Today was clear + nice. The temperatures were low 50° high 80°. The wind switched to the north + blew about 10-20 mph. + got rather chilly. I was really surprised to see the hawks + the Cormorants flying over home. I finally had my car worked on (fixed?) at a garage today. I picked it up late this afternoon. I just drove it home. Tomorrow I will try it out. I'll keep my fingers crossed

Today ~~was~~ was partly cloudy, windy and chilly. The temperatures were low 42° high 71° Pearl & I drove down around the lakes this morning. We were home at 11 A.M., where I stayed the rest of the day. The forecast is for frost tonight so we picked our tomatoes & mango peppers. We picked close to one bushel of ripe tomatoes & probably threw away close to that amount that were bad. We picked about five bushel of green tomatoes for Pearl's sister Alice & we threw away at least half that amount. We picked almost one bushel peppers.

Today was cloudy & chilly all day. The temperatures were a record low 33° high 59°. We had frost here at home this morning and ~~frost~~ ice on the bird bath. Pearl & I left here at 7:20 A.M. & headed for Squaw Creek. We stopped by Honey Creek on our way. I was sure disappointed at how things are at Squaw Creek. There is very little water there. We were back home at about 2 P.M. The car worked good.

Today was clear + chilly early a.m., clear and pretty warm this afternoon. The temperatures were low 44° high 73°. I left home at 7:15 a.m. I picked up Kenneth Jackson and we proceeded to make a day of birding. I got back home at 6:15 P.M. We first went Broome Lake at the airport, then to Lake Contrary, Muskrat Lake, Horseshoe Lake, back home by way of Ashland Cemetery + then up the River Road to Squaw Creek + then back home, going through Ashland Cemetery again. I am rather tired again this evening, with a strong wind, lots of automobiles and real dry roads it was really terribly dusty + dirty today.

Today was clear, cool, and windy. The dust is terrible due to the extremely dry weather. I picked up Ken Jackson at 7:30 A.M. We headed south east of town. Ken has been working on a bridge over the Platte River for a few months and while in the area he had found one good country road for birding a short distance southwest of Agency, Mo. We birded that area first and then zigzagged country roads to the Trimble Wildlife Area. After leaving there we went on down to the Smithville dam of what will be Smithville Lake. It is only a couple miles from the town of Smithville, Mo. There is some water backed up now but only a small amount of what will be in a year or two. I was much surprised at the number of waterfowl on it today. Sometime soon, possibly the first of 1981 I will also list the Trimble area as Smithville Lake as the lake will cover the area now listed as the Trimble Wildlife Area. The area then will have the name changed to "Hornet Cove" because the present Trimble area is the home of the Giant Canada Goose. The Smithville when at full capacity will cover approximately 8000 acres. We did quite a bit of walking today. When we left there we were tired so we came home a little earlier than usual. We drove through Ashland Cemetery but didn't find much of any thing there. We got home shortly after 4 P.M. The temperatures today were low 46° high 68°. The forecast for tonight is low 30's with light frost. At this time 8:45 P.M. it is 41°. Now if we could only have some rain. At the present time we are about 10 inches below normal in precipitation.

Today was clear + chilly a.m., clear + nice this afternoon. This morning we had heavy frost + freeze. The temperatures were low 28° high 68°. First I went to Ashland Cemetery where I took my walk. Then at 10 a.m. Pearl + I took a drive down around the lakes. This afternoon we took a 75 mile drive up thru Amazonia, Savannah, Rosendale, Wyeth, Rea, Whitesville, King City, Helena, Cosby + then on home. There was no wind today but every place is so dry the fine dust is everywhere and any thing moving especially automobiles really stir it up.

Today was clear & nice. The temperatures today were low 45° high 61°. Pearl & I went to Squaw Creek this morning. There were lots of birds there but we couldn't get close enough to get a good look. Someday I am going to go to Squaw Creek & spend the whole day. I am always saying that but I don't do it. We were home at 3 P.M. & we then went to the airport but we didn't get anything there.
