

89 Field Sparrow

Today was clear, hot and windy. Temperatures today were low 56° high 79°. I believe today was the windiest day that I have ever tried to bird. There was times at Squaw Creek that it was hard to stand up without taking a step back to keep from losing our balance due to the wind. Si Rositzky picked me up at 6:30 a.m. Diane Watson was with him. We went first to the Little Bear Marsh area, from there we stopped off at Bluff Woods where we walked a part of the Lone Pine Trail & then the Asphalt Trail. From there we came back to town & drove out the Mitchell Ave Road and back in Cook Road. From there birded a little in the timber along the Northwest Boulevard System. Si let me off at home at 1 P.M. I ate dinner at home with Pearl & Lois. Si came back & picked me up at 3:30 P.M. & we headed for Squaw Creek. With us were Rev. John Watson & his wife Diane and Monya Rositzky. We came back down the River Road especially for the Whip poor will & Chuck wills Widow.

Today was mostly clear, windy + warm. Temperatures were low 60° high 78°. Leo Galloway picked me up at 7 a.m. Our plans were to try for a big day. We birded first at northwest blvd. From there we went to Honey Creek + from there to Squaw Creek. Leo had his mind made up from the time we started this morning that it wasn't his day. I really believe that because of his mental outlook he brought many little insignificant things to happen. The worst was when a strong gust of wind came along + blew my telescope over + it hit him on the head as it fell. A few minutes later his hat blew off into the water. He wasn't going to wade for it and when he finally decided to go for it it had slowly sank and he couldn't find it. A car with a couple of fellows in it stopped us + asked for the time. Leo told them and after they had gone on he looked at his watch again + realized that he had looked at the second hand on the watch + he had given them the time 25 minutes later than it really was + later backing up he almost backed into the same car. We headed home early. He let me out at home at 6:30 P.m. I really believe that I could have birded by myself today and had got 125 species + possibly even more. I guess we all have our bad days. His happiest moment, I believe was when I found the Lincoln for him.

Today was another miserable day as far as birding goes. Mark Robbins and John Robinson picked me up at 6:30 a.m. We went first to Bluff woods, then to Little Bean Marsh, then back by the Lakes and then home. I was at home about 12:20 P.M. when we called it quits. This afternoon Pearl & I drove up to Honey Creek and then out in the Cook Road area and then home. Temperatures today were low 66° high 68°.

Today was cloudy a.m. till about 11 a.m. when it cleared off & was clear & nice the rest of the day. Pearl & I drove to Bluff woods this morning where we took our walk. We came back by Lake Contrary & then on home. At about 12:30 P.M. I went up into the hills along the northwest park way. Just as I was going in, Ken was coming out. He ~~said~~ said that at about 10:30 a.m. he saw and heard more warblers up there than he had ever seen and heard before. He saw four species that I haven't had yet this year. I did get one, the Black throated green. While I was up there the warblers had either moved out or were sitting & resting, staying under cover. Temperature today were low 54° high 72°.

Today was partly cloudy & warm. The temperatures were low 55° high 75°. Si Rositzky picked me up at 6:40 a.m. we went to Gray Park first & then in the hills along the northwest park way. Birding was terrible. We expected to see & hear lots of Warblers but there were practically none. Ken Jackson birded with us about an hour. Si brought me home about 10 a.m. Pearl & I then birded from about 10:30 a.m. until about 2 p.m. I then stayed home the rest of the day.

Today was mostly cloudy + windy until near noon. It was mostly clear this afternoon. Temperatures today were low 59° high 79°. I bided 8am until near noon in Krug Park and in the timber along the northwest boulevard parkway. After lunch Pearl + I took a drive out east of town, down to Bluff Woods and back by the lakes.

Today was partly cloudy, a bit breezy and warm. The temperatures were low 56° high 76°. I birded by myself 8 AM until 10:30 AM. in the woods along the northwest boulevard system. Then Pearl & I took a short drive out east of town in the 102 River and Platte River areas. Today I saw either two Red foxes in the hills along the northwest park way or I saw one fox in two different spots. The first one I was only about 30 to 40 feet from it when it saw me & ran back into the brush. The second one was only about 20 to 25 feet when it came into a path ahead of me & continued on down the path.

Today was mostly clear & nice, although rather warm. This afternoon it began clouding up and at about 7 P.M. it began raining and from about 8 P.M. till 9:30 P.M. it really had a thunder storm. We had strong winds, heavy rain, lightning and threats & warnings of Tornadoes. The Tornado warning was called off about 9:30 P.M. This morning Pearl & I made a drive down around Bluff Woods and back by the Lakes. After lunch I drove to Squaw Creek, arriving there at 11:30 P.M. I went by myself. I made the 10 mile tour of the main pool area and then walked out the (walk only) dike which is called Pintail Point. Mark Robbins came out an hour after I got there. We birded there on shore birds untill 6:30 P.M. when stormy conditions ran us back. I got home at 7:45 pm

Temp. high 78° low 65°

Today was mostly cloudy all day. The temperatures were low 49° high 61°. Kenneth Jackson picked me up at 6:30 a.m. & we headed north. Our first stop was at Krug Park. From there we drove on up to Honey Creek when we left Honey Creek we drove on up to an area near Tarkio, Mo. The area is what they call the Tarkio Breeding Bird Survey route. This is Ken's home town area so he has agreed to cover this area. I went with Ken today because I am familiar with all Breeding Bird Survey operations and Ken has never run one before. Ken will make the official run during June. This survey starts about 12 miles east of Tarkio, Mo.

and ends about 12 miles west of Tarkio. It is mostly in a direct line east and west. It goes thru a part of the Brickyard and Hill Wildlife Area and ends just about two miles from the Missouri River on the west end. From here we drove down to Big Lake and from there to Squaw Creek. All the roads at Squaw Creek were locked off due to muddy roads. The birds we had there were all seen from one point of observation. We got home about 4:30 P.M.

* - The Robbins Farm (appx 5000 acres) north east of Maryville Mo. — MSL - Maryville Sewage Lagoons. This morning at 6:15 a.m. I picked up Kenneth Jackson and we headed for Maryville, Mo. We arrived at Mark Robbins home at 7:15 a.m. Mark was just loading his Station Wagon when we got there. We had gone to Maryville on Marks invitation to look for the Alder Flycatcher and the ~~Mocking~~^{Hooded} Warbler which he had found there yesterday. We started out by going to the Robbins Farm, north east of Maryville. We banded there about three hours. Mark saw, heard and identified the Alder Flycatcher for himself but I heard it only two times without seeing which of the many Empidonax flycatchers it was that was singing. Most of them were Least Flycatchers. We could not see or hear the Hooded Warbler at all. After giving up there we headed for the Sewage Lagoons. Very shortly after arriving there we heard the Alder Flycatcher song and call note. After maneuvering around quite a bit and wading thru mud, water and stinging Nettle about 5 feet high we finally found the bird that was singing and calling and watched the bird while it was performing. This is my 31st. consecutive year to have added one or more bird species to my Missouri bird list. I now have 331 species of birds seen in Missouri since July 2, 1952. Ken Jackson also added the Alder Flycatcher and the Mourning Warbler to his Missouri life list. To day was cloudy & cool all day and very muddy and wet under foot. Temperatures low 51° high 70° Ken & I left Maryville at 1 P.M. & arrived home at 2 P.M.

Today was clear & nice early a.m. & I had planned on a full day of birding. We left home (Pearl & I) at 8:45 a.m. and it was already beginning to cloud up. We drove first east of town especially for Western Meadowlark & Bobolink. It rained on us before leaving that area. We then drove to Honey Creek Wildlife Area. Leaving there cut over to the State Hwy "T", I refer to it as the River Road. Luckily we did because all of our Blue Grosbeaks were there. We got to Squaw Creek shortly after noon when we ate our lunch. We made our complete round except for one road which was blocked off. We had just come

back to where we had seen the Glossy Ibis when it ~~started~~ began raining lightly. We drove then to headquarters. We had been there only a few minutes when it began ~~to~~ raining hard so we headed for home. We got home at 4:30 P.M. It has rained hard off & on ever since then and we still have (9:15 PM) thunder storm warnings. We had a Tornado warning around 7 P.M. The temperatures today were low 60° high 75°.

Today was a beautiful day other than being a bit to warm. It was clear practically all day. There were only a few scattered clouds. The temperatures were down 61° high 79°. After a very stormy night Pearl & I drove out the Mitchell Ave Road and out east on Cook Road. Out east on the Mitchell Ave Road where the Platte and 102 Rivers are only about a quarter of a mile apart, one of them, I don't know which, maybe both were out of their banks and the road this side, between them and the other side was under water. ~~Q~~ Probably a mile of road was under water. It looked like a huge lake. This had to be caused by heavy rains north of us yesterday evening and during the night. My rain gauge showed 2.4 inches of rain which had fallen during the past 24 hours. I stayed home the rest of the day.

 The birding what began as a beautiful day turned out to be a lousy day. Ken picked me up at 7 a.m. & we went to Kong Park first for an hour or less and then because the weather was looking bad we headed for Squaw Creek. We drove thru rain most of the time on the way up. It was not raining when we arrived there and most of the roads were open. The wind had begun blowing hard so we ^{took} a quick drive through to pick out the easier to see birds and then would work our way back trying to pick out many of the ones we had missed going thru. We hadn't gone very far before it became dark and began raining. We got out as quick as we could and got back to headquarters at 10:30 a.m. It was pouring down rain so we headed for home. I got home at 11:45 a.m. I stayed home the rest of the day. We have had about one inch of rain. Temperatures low 60° high 67°.

Today was cloudy and rainy all day until late this afternoon. Temperatures were low 53° high 62°

I stayed home untill mid afternoon and then Pearl and I made a round of the Cemeteries, Mt Olivet, Mt. Auburn, Memorial Park and the Frazier Cem. We were gone only about two hours or a bit over. Late this afternoon it partially cleared off and the sun really looked good.

Today was a beautiful day. It was clear all day and cool with no wind. Pearl & I drove down to Bluff Woods this morning and then by the lakes and on home. This afternoon it was so nice we decided to drive to Squaw Creek. We left home at 2:30 P.M. & drove directly to Squaw Creek. We stayed there until 9 P.M. so that we could listen for the Chuck-will's-widow and the Whip-poor-will. We got home at 9:45 P.M. The temperatures today were low 41° high 68°.

Wednesday, June 2, 1982

35	Lark Sparrow	3	HC
36	Chipping Sparrow	1	X
37	Field Sparrow	7	HC

Today was another cloudy, damp, chilly day. It did not rain however. The temperatures were low 5-8° high 62°. This was Lois' day off all day and it was also the day for mine + Pearl's Social Security checks so while they spent most of the day shopping and running around paying bills I took a drive up to Honey Creek Wildlife Area. I took about a two mile walk there that I have been wanting to take for quite a while. I could have done better if the weather was more pleasant.
