18	Thayer's Gull	3	St. Louis

To Day was mostly clear, chilly and a bit windy. The temperatures were low 8° high 35°, I got up this morning at 1:00 a.m., Ken Jackson picked me up at 1:45 a.m. & we drove to the Holiday Inn Motel where we packed up Dave Easterla and headed for St. Louis via Kansas City and Columbia. At Columbia we met Ike Adams and Fred Young. We left Kens smaller car there and went on to St. Louis in Fred Young's car. This trip was planned to look for the Slaty-backed Gull. We met Chick Anderson at Chain of Rocks on the Mississippi at 9 AM. There was about 50 birders lining the River bank with their scopes set up looking over a large flock of several hundred gulls. We lined up with them. Many of us saw the gull frequently but it was too distant to see the field marks which make it the Slaty-backed Gull. I know that many of the birders listed it as the Slaty-backed only because it was the only black back & black winged Gull flying

flying in the huge flock. We knew that it just ~~about~~ had to be the Gull that had been identified as a Slaty backed Gull by experts on Gulls the day before but not being able to see some of the field marks we agreed not to put it on our list. Later in the afternoon the five of us who were together went down the river a ways where we had a better viewing area and the sun more to our back. We were there about an hour when all at once Dave yelled, there it is floating down the river in front of us. From then for at least half an hour we watched continually floating down & then flying back up. Several times it would wheel in front of us and all five of us got much better looks at ~~it~~ it than any one could have had during the morning. We all agreed that we had observed it close enough and observed most of the identifying marks to entitle us to put it on our life lists. We finally left there at 3:30 P.M. & headed back toward Columbia, Mo. We arrived in St Joseph at the Holiday Inn at 8:50 P.M. and I was back home at 9:10 P.M. We were all happy. From all we heard it appears that this species has never ever been recorded in any of the lower 48 States. The bird sightings listed at St Louis were seen on the Mississippi River or near by.

Today was a beautiful day. It was clear with bright

sun shining all day. Pearl + I took a short drive this morning down around the lake area + on back home. We were hoping for Longspurs but we did not see longspurs or Horned Larks either one. This afternoon I took Pearl to Dr Craig. She does not go to him now for a month. Tomorrow I take her to see Dr. Rangenini, the cancer specialist. Temperatures today were low 27° high 42° yesterday morning Richard Wolf from the Museum and Phillip Rice, northwest Missouri supervisor for the Missouri Conservation Dept. came by my house. They had a ~~hawk~~ hawk they wanted me to identify for them. I identified it as a Prairie Falcon. It was a live bird, very active and was in a fish net. I couldn't see all of the identifying marks but I am sure it was a prairie falcon.

Today was mostly clear, windy + chilly all day. The temperatures were low 14° high 32° . Pearl began getting sick last evening about 8 P.M. from her chemotherapy treatment. She wound up being sick and vomiting all night. I was up with her most of that time. I really felt sorry for her she was so sick. She has been in bed all day today, pretty sick most of the time. It is 8 P.M. now, I am going to bed soon. I have had somewhere from two to three hours sleep out of the last 37 hours. Leo Galloway called me this morning. He went to St Louis yesterday but was unable to find the Slaty backed Gull.

Today was clear + pretty nice ~~perfect~~ compared to the past few days. It was rather windy. Temperatures were low - ~~4°~~ high 24°. Shortly after lunch today Ken Jackson called and told me he had seen a Prairie Falcon this morning at the same place I had seen the Goshawk a few days ago. He came by + picked me up and we went back and got a very good look at the Falcon. When we left there I could see Ken was going to be driving close to where Mike McKenzie lives. I asked him to go by Mike's house and I told Mike about the bird and asked him to call Leo Galloway. I called Mike later in the afternoon after I got home. He said that he and Leo both got a good view of the bird. It was a lifer for Mike. I'll sure be glad when nicer weather gets here so I can get out more often and take Pearl with me.

Today was clear and real nice. Temperatures today were low 29° high 58°. Except to put feed out for the birds this morning while Lois was still here I stayed in all day. Pearl finally got very sick again last night at around 11 P.M. and began vomiting. She was sick and vomiting all night and then she was sick all day today. Her vomiting tapered off quite a bit today. I ~~did~~ felt so very sorry for her. I wanted to help her in some way but it seems I ~~can~~ couldn't do nothing to make her feel any better. I did stay right with her all day.

Today was cloudy all day with light rain part of the time. Temperatures were low high. Pearl & I took a short drive this morning down around the lakes and back home. Afternoon I took a two mile walk along the boulevard. I really enjoyed it but it was hard on the the calves of my legs. It took me 52 minutes. I plan to keep this up at least until I get myself in decent shape.

 Temperature were low 35° high 49°. This a.m.
 Pearl + I drove down around Lake Contrary + then back
 to town + west in Kansas to near Troy. Pearl went to
 Mr. Ranzin's this afternoon to have a blood sample
 taken. From there we drove down around the lake.
 This morning at Lake Contrary we saw a Coyote
 on the ice out in the center of the lake.

Today was mostly cloudy and cool all day. Temperatures were low 38° high 50°. I stayed home all day. We have a small dog here at home that is keeping us rather upset. It is a small dog, mostly Chihuahua that except for being just a bit larger than our other "Chihuahua" Buttons" which died several years ago, looks exactly like her. Buttons was Pearl's dog and she has always loved the Chihuahuas. She read in the paper a few nights ago where some lady had a Chihuahua that she wanted to give to someone if they would give it a good home. Pearl called the lady. She told Pearl that she had picked it up off the sidewalk down town. She thought first that it was dead but shortly realized that the dog was alive. She took it to a Veterinarian. The Vet kept her two days. Pearl & Lois picked her up yesterday morning. We have spent about all day yesterday & today looking after her. She has a broken Pelvis and apparently a head injury of some kind. She wants to walk all of the time quite often in circles. We shut her up in the kitchen over night and I really believe that she probably walked all night. This morning we had to get a deep box to put her in. By doing this she slept for three or four hours. It is probably a head injury which makes her walk so much all of the time, especially in circles. We will try to take care of her for about a week. If she doesn't show any improvement then I don't know just what we will do.

Today was clear & real nice. Temperatures low 26°, high 50°. I drove by myself this morning down around the Lakes. Then

this afternoon Pearl had to go for her blood test to her doctors office. We came home from there and took our new little dog to the Vets and had her put to sleep. She was slowly getting worse. I felt so sorry for her. I really believe she was almost dead when we took her to the Vet. She was breathing but that is the only way we knew she was alive.

Today was cloudy, windy & chilly all day. Temperatures were low 32° high 40°. I was surprised that we missed the 3 to 7 inch snow that was forecast for us last night. It went across the state south of us from the south-western parts of the state to the north east. We had only a few flurries, not enough to see on the ground. They had up to 15 inches + more in the Ozarks

Today was mostly clear, very windy and chilly. The temperatures were low 26° high 38°. Pearl & I took a ride this morning down around Lake Contray, Mud Lake & by Muskrat Lake, Horseshoe Lake & back home. It felt good to day to get over 40 species in one day for the first time this year. Actually I have to go back to Nov. 4, 1983 to have a day with more than 44 species.
