

[illegible][illegible]

5/13/72

This bird was found at the Sycamore Creek N.W.R. on May 13, 1972 about 4:15 P.M. D.S.T. by Mark Robinson. It was in the wet pool where the water area covered was rather extensive but not more than about 6 inches deep in the deepest spot. It allowed a real close approach. I viewed it at about 40 feet and Mark got to within about 25 feet to take pictures. Although other shore birds were there by the hundreds, probably thousands this bird seemed to stay to itself. Although it was in winter plumage it was beginning to change enough that I don't think it is a start yet. Its bill was yellow & Mark's pictures should come out real good. I sure hope so. It was a Chatter Skimmer, stay with intermittent show and some times strong winds. The bird was seen at a very close range by Mark Robinson, Tom Early and myself and at a greater distance from the roadway by Harold & Burgess and my wife & I.

COMMENTS:

The two records Jan 29, 30, 1972 of this species was seen from Riverside Home in St. Louis Mo. ~~They~~ ^{It} were in the Mississippi River. On 29th I saw it with Mark Robins of Marquilly, Mo. and Richard Anderson of St. Louis. On the 30th the same three of us plus Paul Baur of St. Louis, Ike Adams and Wm. Goodge of Columbus saw either the same bird or one that looked just like it. It was a first year white bird.

This image shows a single sheet of white, lined notebook paper. The paper has horizontal blue or grey ruling lines spaced evenly down its length. A single vertical line runs parallel to the left edge, creating a narrow margin. The paper appears slightly aged or off-white. There are some faint, illegible markings near the top center, possibly from a stamp or bleed-through, and a small dark speck near the bottom right corner.
