Dear Brother

Well I see that stork is an early bird it came off sooner than expected. Well good luck to all. Glad to hear your wife is getting along so nice.

Regarding the fire hose that is entirely O.K. you buy at least 200ft I think 300 ft would be better but we can get more latter better try some and see how we like it, also buy a nozel to fit the hose.

Regarding the pamphlet will say that the cuts are all made excepting the cut for the map. Mr Chapman wrote me and told me the Rand & McNally people have a copy-right on the map I sent him to be copied from.

The only way to have a map from that copy would be if they make the cut other-wise we would take a chance of a fine if we use same without their permission.
