San Diego 13, California

Gentlemen:

As Chairman of the drive to restore the "Star of India", I wish to express the appreciation of the Committee concerning materials and labor which you recently donated in connection with electrical work done on the "Star of India".

When this ship is finally restored it will be a great attraction for San Diego and it will only be restored because of the public and civic minded individuals and companies who have freely given of their time and who have donated services, materials and money to this project.

Unfortunately, all that we can do is to thank you for your help, however, when the ship is restored there will be a permanent log on board in which your name shall be inscribed.

Sincerely yours,

J. A. DONNELLEY
