India. It would certainly be appreciated if this material can be made available without charge or at a substantially reduced price to the Restoration Committee. You will be interested to know that other concerns in San Diego and Los Angeles have already contributed substantially toward the restoration of the Star of India and all such contributions are fully tax deductible.

Should the foregoing material be available, we would appreciate having it shipped to:

Star of India Restoration Project
State Historical Ship Project
California Division of Beaches and Parks
Middle Harbor Road
Oakland Dock and Warehouse Company
Oakland, California

The foregoing address is being used since the California Division of Beaches and Parks has made available to us the rigging loft which has been used to restore historical vessels in the San Francisco Bay area. We have also been fortunate in securing the services of an experienced rigger who is working for us on an hourly basis and according to Mr. MacMullen is doing a superlative job.

As you can see things are moving rapidly and we hope to have the rigging done by the end of this year. Excitement over the project is reaching new highs in San Diego and donations are beginning to come in for completing the restoration. You and others like you are deserving of high praise from our community and I am sure any action you take will be deeply appreciated.

Very truly yours,

CARL F. REUPSCH
Business Manager
