RAILROADS OF NEVADA

AND EASTERN CALIFORNIA

by David F. Myrick

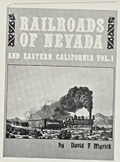
In Two Big Beautiful Volumes

Now Ready **VOLUME I—THE NORTHERN ROADS**

For 1963 Publication **VOLUME II—THE SOUTHERN ROADS**

These are the most comprehensive and unusual railroad books we have yet published. Exhaustively researched in archives of every imaginable description and double-checked by thousands of miles of travel to remote corners of the area, RAILROADS OF NEVADA is both an exacting historical treatise and reference, yet one of the most alive and humanly compassionate railroad histories we have encountered. Packed with historical dates and facts, supported by hundreds of pictures and supplemented by area, route and detailed local maps, these two matching volumes will be invaluable for the pure joy of reading, the fun of browsing, or the utility of a current travel guide to a legendary past. The work will be supplemented (in Volume II) with a complete Directory of all roads constructed or projected, a Working Index, and other useful and unusual features.

Volume 1 contains a special large area map in map pocket at rear.



Set will include:

- Rosters
- Complete directory all RR Lines
- Working index to both volumes

Price: Vol. 1 (only) $12.50
