HAWAII

Situation — The group proper is situated between 18 degrees 54 minutes and 22 degrees 15 minutes north latitude, and 154 degrees 50 minutes and 160 degrees 30 minutes west longitude.

Number of Islands — Six of consequence, in order of size being Hawaii, Maui, Oahu, Kauai, Molokai, Lanai. Kauai is the most northern and Hawaii the southernmost.

Mountains and Volcanos — The celebrated Volcano of Kilauea is situated on the flank of Mauna Loa, Island of Hawaii, as is also the intermittent Volcano of Mokuaweoweo, the loftiest point of which is 13,505 feet. The lava flows of 1899 came from Mokuaweoweo. Mauna Kea, on Hawaii, rears its lofty summit 13,865 feet. The Kohala Mountains, 5,505 feet, are in north Hawaii. Haleakala, the largest extinct volcano in the world, 10,030 feet, is on Maui.

Temperature — Temperature at the end of each month for a year, at Honolulu, H. I. at 1 p. m.

January	75°	May	82°
February	74°	June	82°
March	73°	July	84°
April	79°	August	84°
September	83°		
October	79°		
November	75°		
December	74°		

Coasts — The coast lines are regular, bays and natural harbors are few. Hilo Bay contains an eligible site for harbor works, it has safe anchorage and a newly constructed wharf. Other bays are Kealakekua, Kailua, Kawaihae, Mahukona, Kahului, Kaunakakai, Lahaina, Kaholoki, Kanu, Honolulu is the best harbor in the group and gives excellent anchorage, and has large wharfage facilities.

Population — Census of 1900 gives the entire Island population as 154,001 subdivided by islands as follows:

Oahu	58,504
Hawaii	46,843
Maui	24,797
Kauai	20,734
Molokai and Lanai	3,123
Grand Totals	154,001
