The records of the Bureau of Marine Inspection and Navigation in the National Archives show that the ELSIE was the only vessel to be documented in the port of San Diego, California, before 1864. The index to enrollments issued at San Francisco during the years 1850-62 does not include the names of the vessels PLUTO (PLUTUS) or LOMA. San Diego and San Francisco were the only ports of documentation in California during the 1850's.
