

VARIETY OF LEATHER PRODUCTS

The custom tanning of green deer hides is handled by the Merrill Glove, Mitten & Tanning Co., which was organized in 1895.

From these hides the company makes gloves, mittens, moccasins, shirts and hand-laced buckskin jackets.

Other products are baby booties, Texas boots, souvenir coin purses and other small leather novelties. Mitts made especially for mink handlers are sold to fur ranchers in all parts of the country.

The company has branched out in recent years to make suede coats, suits, jackets, hats, etc. This suede material is water-repellant and comes in many brilliant colors.

The business is operated on a custom, wholesale and retail basis.
