DIVISION OF LABORATORIES

ROOM 344, STATE OFFICE BUILDING

PROVIDENCE

LESTER A. ROUND, PH. D.

DIRECTOR OF HEALTH

EDGAR J. STAFF, SC. M.

CHIEF OF DIVISION

April 23, 1941

Dear Doctor Hinton:

Will you kindly examine slide for rabies.

Specimen B-19

Gasserian ganglia -- dog

History: Dog hit by auto on April 18th;
bit person who attempted to pick dog up; dog died
on 19th of April.

Dr. Lester A. Round of our department
examined this slide and felt that the microscopic
picture appears to be negative for rabies. However,
in view of the fact that there is a slight cellular
change rather evenly distributed, a diagnosis was
withheld.

With many thanks,

Edgar J. Staff
EDGAR J. STAFF, Sc.M.

Chief, Div. Laboratories

Dr. Edgar J. Staff
Chief, Division of Laboratories
Rhode Island Department of Health
Room 344, State Office Building
Providence, Rhode Island

Dear Dr. Staff:

We have examined for rabies slide
covering your Specimen B-19, Gasserian ganglia,
and agree with Dr. Round's diagnosis that specimen
is negative for rabies.

Very truly yours,

Wm. A. Hinton, M.D., Chief
Wassermann Laboratory
