September 16, 1938

Department of Public Health (0)  
State House  
Boston, Mass.

Dear Sirs:

Regarding Hinton test on Mr. Carl Seligmann, listed under this name and under initials, this patient is returning to his New York physician, Doctor C. C. Guion, 421 Huguenot Street, New Rochelle, New York, who will be acquainted with the results of these examinations.

Mr. Seligmann has had intensive treatment in the remote past and, to our knowledge, all tests, including spinal fluid, have been negative up to this point. The original infection occurred in 1896. The patient has always been cooperative and, in our opinion, is not infectious.

I hope this is the information you require.

Very truly yours,

*Harold F. Corson*

Harold F. Corson, M. D.
