

February 14, 1952

Dr. Joel Rosenberg
31 West Central Street
Natick, Massachusetts

Dear Dr. Rosenberg:

In reply to your letter of February 11 I wish to say that if the first doubtful report was obtained five or more years ago you can be certain that your patient will not transmit the disease to his future wife. Moreover, a persistent doubtful over a period of years almost always means a false doubtful unless there is clinical evidence of the disease.

Very truly yours,

WAB/ad

Wm. A. Hinton, M.D., Director
Wassermann Laboratory
