

MEMORANDUM

Subject: - Preliminary Report for
1943

To: - Dr. Getting

From: Wassermann Laboratory

Date: December 8, 1943

Enclosed please find table which shows the number of tests done for the first eleven months of the year 1943. It is believed that the number of tests for the entire year will be slightly less than for the previous year because of a notable decline in requests for tests for syphilis by the Selective Service Boards.
