JOEL ROSENBERG, M. D.
31 WEST CENTRAL STREET
NATICK, MASS.

2/11/52

Gentlemen:

The Blood enclosed herewith
was taken for the second time today.
First report was returned doubtful.
(3) Several years ago blood taken on same
patient was returned as doubtful.

Patient has no symptoms relative
to Scurvy - but the problem at present
is - He plans to re marry soon.
Will there be any possibility of his
future wife of contracting Scurvy
on a doubtful test?

I would greatly appreciate
any information you could give
me in order that I may give
these people the proper advice

Thank You.

Joel Rosenberg, M.D.
