

HOWARD W. ROGERS, M. D.
83 HIGH STREET
NEWBURYPORT, MASS.

February 20, 1941

Wassermann Laboratory
25 Shattuck Street
Boston, Mass.

Gentlemen:

Sometime between May 20, 1940 and October 20, 1940 Mrs. Ralph Roberts, 26 Parker Street, Newbury, had three specimens of blood sent to you by me for Hinton tests.

I have the report of two of these in my files, i.e., that of July 16, 1940 and July 20, 1940. The other one, I have evidently misplaced.

Would you be kind enough to look this up and send me a copy of the report.

Yours very truly,

HWR/L

H. W. Rogers (2)

February 24, 1941

Dr. Howard W. Rogers
83 High Street
Newburyport, Mass.

Dear Dr. Rogers:

We have your letter of February 20, requesting copy of a report on Mrs. Ralph Roberts' blood taken sometime between May 20 and October 20, 1940.

Our records are not kept alphabetically, either in the name of the patient or physician, but chronologically. Since we have an average of over 2,000 cases daily, we are sure you will appreciate the fact that we cannot look up this case for you until we have had a definite date on which the blood was sent to us.

Very truly yours,

Wm. A. Hinton, M.D., Chief
Wassermann Laboratory
