Dr. H. M. Wiggles
Laboratory for Blood
Examination, 400 Massachusetts

My dear Dr. Wiggles:

You have been on my mind for the past week. I was expecting to hear from you in relation to your young patient whose blood gave a doubtful reaction.

I trust you have found a solution to the problem. If you have not, please drop me a note.

As ever

Sincerely yours,

William F. Hinton, M.D., Chief
Wassermann Laboratory

W.F.H.
