David,

I wanted to thank you for all the information about Shelburne and to tell you how much I enjoyed talking with you. I have attached snapshots of the Shelburne Creamery that I took in 1969 with my parent's instamatic camera. I wish the quality was better. You can identify the business sign in the dense brush out front as well as the concrete posts for the can conveyer belt. As you can see, the creamery was quite a sight back then. If you can send me that photo you had on display of the creamery that shows the water tank on the left end and the store building and gas pump out front, I would appreciate it. You said you thought it dated from the 1940s. I have a copy of the other front view that was a postcard.

I finally had time to scan through the 250th anniversary brochure and wished I had picked up a second for my sister. Oh well.

I found that book "The Rebel and the Tory" from the VT Historical Society about Ethan Allen and will probably buy a copy sometime soon. Thanks for the tip.

Hi Joe!

I very much enjoyed talking with you as well. Discoveries like we both made are what's great about following history. You never know what you're going to find!

Thanks for forwarding me the pictures you took of the creamery. They are excellent, a real piece of the history of the building and story. You can really see how the building was constructed, especially the water tower.

I'd like to ask if you are comfortable with scanning pictures. Ideally when pictures are available, I try and scan them to 300 and even 600 dpi. If you aren't, would you be willing to mail them to me and I can scan them and then mail them directly to you with the scanned images?

As far as the 250 Anniversary copy, I'll put one in the mail for you, to the address on your email? And I attached the picture of the creamery that you asked for plus a couple of other items. Enjoy!

David

Hi again Joe,

What I'm looking for is each photo scanned to 600 dpi. Usually I do a scan of 600 dpi or greater in a TIFF format and then 300 dpi in a jpg format. Would that be possible? The larger dpi would allow us to enlarge a picture for research purposes.

Thanks for your work!

David

David,

Yes, the mailing address is correct. I appreciate it.

I have attached two scans of 4 photos each at 600 DPI. Let me know if this is what you want or if you want each photo done individually or to 300 DPI. As I mentioned, the originals are 3.5" square prints made from my parents' Kodak instamatic camera so they do not have the resolution of photos from a 35mm camera.

Hi Joe,

You did better than you think you did! I received 8 files all TIFF format and all opened. Thank you so much for all your effort! I have all these photographs in the folder with other items about the Creamery

I received an email notification from Dropbox. I clicked on it, it asked to set up a free trial which I did and then I was able to access and download the images.

Thanks again for donating the pictures. It certainly helps to tell the great story of the creamery!

Be well,

David

David,

I tried to send the tif files to you via dropbox, but I can't figure out how to do it. Let me know if you receive a notification from dropbox.

Joe,

Thanks for the clipping! I had gone through [newspapers.com](https://www.newspapers.com) and found articles about the creamery up until the 1950's but not past that. Your article has a few more details and maybe a source of interior pictures from the architect? Something to follow up on anyway.

I hope you're have a good summer. It's in the 80's and sunny today, a real summer day but we've gotten a LOT of cloudy rainy days this summer.

Be well, 'till next time!

David
