

BUILDING STONE WANTED.

THE Subscriber wishes to receive Proposals immediately, for the delivery of Building Stone at Fort Adams, Newport Harbor.

The Stones are to be obtained on the land of the United States, from quarries already open and easily worked; and are to be delivered at the part of the work where they are to be laid—which will require a transportation of about half a mile.

Should the Proposals be deemed advantageous to the interest of the U. S. considering the character of the persons proposing and the nature of the security offered, the contract may be made to include a large portion of Stone required for the next year's work.

At present a supply of 4,000 to 6,000 perches is wanted—the delivery to commence as soon as possible.

JOS. G. TOTTEN, *Maj. Eng'rs.*

Brev't Lt. Col.

Fort Adams, July 12, 1826.
