

On Monday last, Brevet Major Gen. Macomb, of the U. S. Corps of Engineers, arrived here from New-York, in the steam-boat Long Branch, on a tour of inspection.—The same day he examined the extensive works now constructing at Fort Adams, (Brenton's Point) under the direction of Col. TOTTEN—and also visited the site for the contemplated fortifications at the Dump-lins, opposite Fort Adams.—On Tuesday he returned in the steam boat to New-York.
