

FORTIFICATIONS.

The Washington Globe of Tuesday last, says :--

" We learn that estimates have been sent by the War Department to the proper committees, for such expenditures as appear to be called for, for the purposes of national defence.

The amount is fortifications, \$5,000,000
For the armament of fortifications, powder, shot, &c. \$1,373,748

\$6,373,748

Making an aggregate of six millions, three hundred and seventy-three thousand seven hundred and forty-eight dollars. — This is independent of the ordinary appropriations for arsenals, armories, &c. We subjoin a list of the fortifications accompanying the estimate, and for the construction and repair of which the money is wanted. Of the amount, \$660 000 is estimated for steam batteries.

If these sums are granted, our sea-coast will soon be put in a proper state of defence.

For fortifications at Penobscot Bay.
For fortifications at Kennebec River.
For Fort Preble, Portland harbor.
